Discussion regarding establishing a strategic plan on safety measures during City Council meetings at City Hall

- Chair Bates stated that the City of Richmond should consider establishing preventive measures concerning security at City facilities in light of the shooting that took place at the City Council meeting recently in Kirkland, Missouri. Some options are the use of metal detectors and surveillance cameras.

- Chief Magnus stated that usually the same officers attend the Council meetings in order to become familiar with attendees in order to note unusual behavior and anticipate trouble. There needs to be a formalized protocol for police involvement during meetings and potentially expand police presence at other public meetings. The limitation of public access during meetings to other areas of City Hall needs to be addressed. Written protocols and training should be conducted with employees on how to respond in an emergency.

- Chair Bates stated that the use of key cards by employees should be considered.
Vice Mayor Marquez expressed concern over comments made about Councilmembers in an untrue and derogatory manner. Attorney Mary Renfro replied that as public officials there are some insults that officials have to endure.
