RECYCLING IS REQUIRED FOR THIS PROJECT
California Green Building Code (CALGreen)

PROJECTS THAT ARE REQUIRED TO RECYCLE INCLUDE:

- **ALL NEW RESIDENTIAL AND COMMERCIAL CONSTRUCTION**
- **RESIDENTIAL RENOVATIONS** that will result in increased conditioned building area, volume and/or overall size.
- **COMMERCIAL RENOVATIONS** that will result in 1,000 square feet of new building and/or projects with a permit valuation of $200,000 or more.

**EASY METHOD: SEND YOUR WASTE TO DESIGNATED FACILITIES**

- Sign and submit this Acknowledgement Form.
- Self-haul or use a franchised debris box hauler to direct all construction and demolition (C&D) materials to a Designated Facility to achieve compliance with State diversion requirements.
- Save receipts of recycling and submit to Building Department prior to final inspection.
- See attached Verification Form for details.

I certify under penalty of perjury that I will recycle C&D materials from my project via (select one):

- **THE EASY METHOD**: As described above. Direct C&D materials to a Designated Facility (see Verification Form) and submit receipts / documentation of recycling prior to final inspection; or
- **THE ADVANCED METHOD**: If you don’t use Designated Facilities, ensure and prove recycling of C&D materials via other means. Requires submittal of detailed information on the back of this form, careful tracking of all materials generated by your project, and submittal of documentation of recycling prior to final inspection.
ATTENTION: Only use this form if you DID NOT select the EASY METHOD and are not using Designated Facilities.

1. Construction waste generated on this project for transport to a recycling facility will be: (check appropriate box)
   - □ Sorted on-site
   - □ Deconstructed and/or reused
   - □ Maximum disposal estimate per CALGreen (refer to code)

2. The method of waste tracking to be used on this project will be: (check one box)
   - □ Weight
   - □ Volume

3. Please identify construction and demolition waste materials that will be generated during the course of this project, and how they will be diverted (reduce waste, recycling, reuse on the project, or salvage for future use or sale) or disposed. Use additional pages as needed. Please note that your project must meet CALGreen’s requirement of minimum 50% diversion, or, if applicable, meet more stringent local regulations.

4. The facility (or facilities) where the construction waste material will be taken is: (attach separate sheets for additional facilities)
   - Name of Facility: ____________________________________________
   - Address: _____________________________________________________
   - Telephone: ____________________________________________________

5. I hereby certify that this project will adhere to the following:
   a. Every effort will be made to use reuse and or recycling measures to reduce the amount of construction waste and other materials sent to landfill. Whenever possible, site-sorted debris boxes shall be used to segregate construction waste materials to maximize materials diversion.
   b. All personnel that will be performing any work on the project site will receive and read a copy of the Construction Waste Management Plan (CWMP). The CWMP will meet all CALGreen requirements. Additionally, all personnel shall be instructed on the location and proper use of debris boxes for disposal of C&D materials.
   c. The process of waste management, recycling and reuse of construction waste materials will be monitored regularly to ensure compliance with the CWMP during the course of the project.
   d. A record will be kept of the total amount of construction waste leaving the project site by weight or by volume, and how these materials will be disposed. This includes copies of tickets or detailed receipts from all loads of C&D materials removed from the project site.
   e. All supporting documentation which demonstrates compliance with the CWMP and required diversion will be provided to the permitting jurisdiction upon completion of the project.

Use this form to document C&D material recycling – documentation is easy.

- Make sure your hauler informs the Designated Facility to process the load as C&D waste for recycling.
- If self-hauling materials, staple “weight ticket” receipts from Designated Facilities to this form.
- If using a debris box hauler, staple “invoice” receipts from the hauler to this form.

Turn in the attached receipts prior to final inspection.

- Log your receipt numbers in the table below in case of lost receipts – Designated Facilities can also reprint copies upon request.
