REACT/CERT
RICHMOND EMERGENCY ACTION COMMUNITY TEAMS

Are you prepared to survive before, during and after the next disaster?

☐ Did you know that for the __first 72 hours__ following a major emergency you will probably be without help from emergency responders (i.e.: police, fire, 9-1-1, ambulance)?
☐ Would you like to know how YOU and YOUR LOVED ONES can survive on your own for these first critical 72 hours until the City is able to get help to you?
☐ Do you know what emergency supplies (food, water, etc,) you should have stored?
☐ Do you know how and when to turn off your utilities following a major emergency?
☐ Do you want to know how to treat for shock, bleeding and other life threatening medical emergencies?

Do you remember 10/17/89 - Loma Prieta? The epicenter for that earthquake center was over 70 miles from Richmond!! The Hayward Fault line runs right through our City. According to the latest 1996 intensity maps there will be major disruptions in Richmond after a 7.1 plus earthquake on the Northern Hayward Fault, over 10,340 homes will be uninhabitable, utilities will be disrupted for over three weeks. Preparing now can minimize the loss of lives and property.

YOU WILL LEARN VALUABLE LIFE SAVING SKILLS IN:

◊ Disaster Medical ◊ Communications ◊ Fire Suppression
◊ Search & Rescue ◊ Damage Assessment ◊ Terrorism Preparedness
◊ Sheltering/ Special Needs and more!

The City of Richmond is offering our community these valuable emergency preparedness classes in your neighborhood. This is your golden opportunity to learn how to save lives and property, before, during and after the next major earthquake.

To register for REACT/CERT classes in your neighborhood, please call or email Richmond Fire Department Office of Emergency Services, (510) 620-6866 or CERT@ci.richmond.ca.us
EARTHQUAKE DROP, COVER & HOLD TIPS

➤ **DROP down on the floor, take cover under sturdy table or desk and hold on until the shaking stops.**

➤ When in a HIGH-RISE BUILDING, move against an interior wall if you are not near a desk or table. Protect your head and neck with your arms. Do not use the elevators. When OUTDOORS, move to a clear area away from trees, signs, buildings, or downed electrical wires and poles.

➤ When on a SIDEWALK NEAR BUILDINGS, duck into a doorway to protect yourself from falling bricks, glass, plaster and other debris.

➤ When DRIVING, pull over to the side of the road and stop. Avoid overpasses and power lines. Stay inside your vehicle until the shaking stops.

➤ When in a CROWDED STORE OR OTHER PUBLIC PLACE, move away from display shelves containing objects that could fall. Do not rush for the exit.

➤ When in a STADIUM OR THEATER, stay in your seat, get below the level of the back of the seat and cover your head and neck with your arms.

➤ **No matter where you are, know how to protect yourself and your family during an earthquake. Practice taking cover as if there were an earthquake and learn the safest places in your home and work. Practice getting out of your home and check to see if the planned exits are clear and if they can become blocked in an earthquake. Practice turning off your electricity and water. Know how to turn off the gas, but do not practice this step. In the event of an earthquake, once you turn off your gas, only your utility company should turn it back on for safety reasons.**

➤ **Take COVER under a sturdy desk, table or other furniture. If that is not possible, seek cover against an interior wall and protect your head and neck with your arms. Avoid danger spots near windows, hanging objects, mirrors or tall furniture.**

➤ **If you take cover under a sturdy piece of furniture, HOLD on to it and be prepared to move with it. Hold the position until the ground stops shaking and it is safe to move.**
EARTHQUAKE PREPAREDNESS TIPS FROM THE
CALIFORNIA GOVERNOR’S OFFICE OF EMERGENCY SERVICES
PREPARING YOUR FAMILY FOR AN EARTHQUAKE

The Plan

☑ Stock up on at least a three-day supply of food, water, clothes, medical supplies and other necessary
  equipment for everyone in your family. Make sure everyone knows where to find them. (See the
  information sheet on emergency supplies.)
☐ Decide where and when to reunite your family should you be apart when a disaster strikes.
☐ Choose a person outside the immediate area to contact if family members are separated. Long distance
  phone service will probably be restored sooner than local service. Do not use the phone immediately
  after a major emergency.
☐ Know the policies of the school or daycare center your children attend. Make plans to have someone
  pick them up if you are unable to get to them.
☐ If you have a family member who does not speak English, prepare an emergency card written in English
  indicating that person’s identification, address and any special needs such as medication or allergies. Tell
  that person to keep the card with him/her at all times.
☐ Conduct Earthquake: Duck, Cover & Hold drills every six months with your family.
☐ Practice Stop, Drop and Roll drills for fire, as well as emergency exit drills in the house (EDITH)
☐ Know the safest place in each room because it will be difficult to move from one room to another during
  an earthquake or explosion.
☐ Locate the shutoff valves for water, gas and electricity. Learn how to shut off the valves before an
  emergency. If you have any questions, call your utility company. Remember not to shut off utility valves
  unless directed to do so by your utility company.
☐ Have enough supplies to get you and your family through at least the first 72 hours. After a major
  emergency, there’s a good chance that traditional emergency response teams will be too busy to take
  care of you and your family. You need to prepare your home and neighborhood.
☐ Make copies of vital records and keep them in a safe deposit box in another city or state. Make sure your
  originals are stored safely.
☐ Before a major emergency occurs, call your local Red Cross chapter and Richmond Office of Emergency
  Services to find out about their plans for emergency shelters and temporary medical centers in case of a
  disaster.
☐ Establish all the possible ways to exit your house. Keep those areas clear.
☐ Know the locations of the nearest fire and police stations.
☐ Take photos and/or videos of your valuables. Make copies and keep them with a friend or relative in
  another city or state.
☐ Include your childcare provider and other household help in your plans.
☐ Keep an extra pair of eyeglasses and house and car keys on hand.
☐ Keep extra cash and change. If electricity is out, you will not be able to use an ATM.

General Tips

☑ Stay away from heavy furniture, appliances, large glass panes, shelves holding objects, and large
  decorative masonry, brick or plaster such as fireplaces.
☑ Keep your hallway clear. It is usually one of the safest places to be during an earthquake or explosion.
☑ Stay away from kitchens and garages, which tend to be the most dangerous places because, tend to be
  the most dangerous places because of the many items kept there.
EMERGENCY SUPPLIES CHECKLIST

The first 72 hours after a major emergency or disaster are critical. Electricity, gas, water, and telephones may not be working. In addition, public safety services such as police and fire departments will be busy handling serious crises. You should be prepared to be self-sufficient — able to live without running water, electricity and/or gas, and telephones — for at least three days following a major emergency (7-10 days preferred). To do so, keep on hand in a central location the following items:

Essentials

- Water — One gallon per person per day (a week’s worth is preferable)
- Water purification kit
- First aid kit, freshly stocked
- First aid book
- Food
- Can opener (non-electric)
- Blankets or sleeping bags
- Portable radio, flashlight and spare batteries
- Essential medications
- Extra pair of eyeglasses
- Extra pair of house and car keys
- Fire extinguisher — A-B-C type
- Food, water and restraint (leash or carrier) for pets
- Cash and change
- Baby supplies: formula, bottle, pacifier, soap, baby wipes, disposable diapers, clothing, blankets, canned food and juices, baby wipes, disposable diapers, canned food

Sanitation Supplies

- Large plastic trash bags for waste; tarps and rain ponchos
- Large trash can
- Shampoo
- Feminine hygiene supplies
- Toilet paper
- Household bleach
- Toothpaste and toothbrushes
- Bar soap and liquid detergent

Safety and Comfort

- Sturdy shoes
- Heavy gloves for clearing debris
- Candles and matches
- Light sticks
- Change of clothing
- Knife or razor blades
- Garden hose for siphoning and firefighting
- Tent
- Communication kit: paper, pens, stamps

Cooking

- Plastic knives, forks, spoons
- Paper plates and cups
- Paper towels
- Heavy-duty aluminum foil
- Camping stove for outdoor cooking
  - Caution: before using fire to cook, make sure there are no gas leaks; never use charcoal indoors

Tools and Supplies

- Axe, shovel, broom
- Adjustable wrench for turning off gas
- Tool kit including a screwdriver, pliers and a hammer
- Coil of 1/2“ rope
- Plastic tape, staple gun and sheeting for window replacement
- Bicycle
- City map
CAN YOU GO IT ALONE FOR 7 TO 10 DAYS?

Tips for Preparing Children
*Children need to be prepared for a disaster as much as adults, if not more.*

**Infants and Toddlers**
For infants and toddlers, special emphasis should be placed on making their environment as safe as possible.

- Cribs should be placed away from windows and tall, unsecured bookcases and shelves that could slide or topple.
- A minimum of a 72-hour supply of extra water, formula, bottles, food, juices, clothing, disposable diapers, baby wipes and prescribed medications should be stored where it is most likely to be accessible after an emergency.
- Keep an extra diaper bag with these items in your car (water, formula, etc.).
- Store strollers, wagons, blankets and cribs with appropriate wheels to evacuate infants, if necessary.
- Install bumper pads in cribs or bassinettes to protect babies during the shaking of an earthquake or explosion.
- Install latches on all cupboards (not just those young children can reach) so that nothing can fall on your baby during an earthquake or explosion.

**Preschool and School-age Children**
By age 3 or so, children can begin to understand what earthquakes are, as well as fires and floods, and how to get ready for them. Take the time to explain what causes these types of emergencies in terms they’ll understand. Include them in family discussions and planning for emergency safety.

- Conduct drills and review safety procedures every six months.
- Show children the safest places to be in each room when an earthquake hits or explosion occurs. Also show them all possible exits from each room.
- Use sturdy tables to teach children to Duck, Cover & Hold during an earthquake or explosion.
- Make sure that children are ready to protect themselves with Stop, Drop and Roll during a fire.
- Practice emergency exit drills in the house (EDITH) regularly.
- Teach children what to do wherever they are during an emergency (at school, in a tall building, outdoors).
- Make sure children’s emergency cards at school are up-to-date.
- Although children should not turn off any utility valves, it’s important that they know what gas smells like. Advise children to tell an adult if they smell gas after an emergency.
TIPS FOR SENIORS

Before a Disaster

✓

- Eliminate hazards. Make it as easy as possible to quickly get under a sturdy table or desk for protection during an earthquake or explosion.

- Anchor special equipment such as telephones and life support systems. Fasten tanks of gas, such as oxygen, to the wall.

- Keep a list of medications, allergies, special equipment, names and numbers of doctors, pharmacists and family members. Make sure you have this list with you at all times.

- Keep an extra pair of eyeglasses and medication with emergency supplies.

- Keep walking aids near you at all times. Have extra walking aids in different rooms of the house.

- Put a security light in each room. These lights plug into any outlet and light up automatically if there is a loss of electricity. They continue operating automatically for four to six hours, and they can be turned off by hand in an emergency.

- Make sure you have a whistle to signal for help.

- Keep extra batteries for hearing aids with your emergency supplies. Remember to replace them annually.

- Keep extra emergency supplies at your bedside.

- Find two people you trust who will check on you after an emergency. Tell them your special needs. Show them how to operate any equipment you use. Show them where your emergency supplies are kept. Give them a spare key.

During and After a Disaster

- During an earthquake or explosion, if you are in bed or sitting down, do not get up.

- If you are standing, duck and cover or sit down. You could be thrown to the floor if you are standing.

- During a fire, make sure you are ready to Stop, Drop and Roll to protect yourself.

- Practice emergency exit drills in the house (EDITH) regularly.

- Prepare to be self-sufficient for at least three days.

- Turn on your portable radio for instructions and news reports. For your own safety, cooperate fully with public safety officials and instructions.

- Prepare for aftershocks after an earthquake.

- If you evacuate, leave a message at your home telling family members and others where you can be found.
TIPS FOR PERSONS WITH DISABILITIES AND ACCESS AND FUNCTION NEEDS

Before an Emergency

✓

- Set up your home, apartment or workplace so that you can quickly get under a sturdy desk, table or other safe place for protection. This will be most important during an earthquake or explosion. Identify doorways that do not have doors in which you can take cover.

- Know how to Stop, Drop and Roll in the event of a fire and practice emergency exit drills in the house (EDITH) regularly.

- Maintain a list of medications, allergies, special equipment, names and numbers of doctors, pharmacists and family members with you at all times.

- Keep extra medication with your emergency supplies as well as a whistle and flashlight at your bedside and if you use a wheelchair, by or in bag with your wheelchair.

- If you need them, have walking aids near you at all times. Place extra walking aids in different rooms of the house.

- Put a security light in each room. These lights plug into any outlet and light up automatically if there is a loss of electricity. They continue operating automatically for four to six hours, and they can be turned off by hand in an emergency.

- Find two people you trust who will check on you after an earthquake or other disaster. Tell them your special needs. Show them how to operate any equipment you use. Show them where your emergency supplies are kept. Give them a spare key.

During and After a Disaster

- During an Earthquake or Explosion, if you are in bed or out of a wheelchair, stay where you are and cover your head and neck.

- If you are in a wheelchair during an Earthquake or Explosion, stay in it and go into a doorway that doesn’t have a door. Cover your head and neck with your hands. If possible, stay away from windows that may shatter.

- Prepare to be self-sufficient for at least three days.

- Turn on your portable radio for instructions and news reports. For your own safety, cooperate fully with public safety officials and instructions. Prepare for aftershocks following earthquake.

- If you evacuate your home, leave a message at your home telling family members and others where you can be found.
CITY OF RICHMOND ALERT & WARNING SYSTEMS

The City has adopted a seven step program for alert and warning the community. Each step on its own is very useful. All steps, when activated, will give us the nexus to warn the community of impending hazards in the most effective and efficient means possible. The seven components of this program are the:

1) 9-1-1 COMPUTER AIDED DISPATCH
2) EMERGENCY OPERATIONS CENTER (E.O.C.)
3) TRAVELERS INFORMATION SYSTEM (T.I.S.) - City’s AM 790 Radio Station
4) RICHMOND’S CABLE TELEVISION STATION - K.C.R.T.
5) SIREN SYSTEM- Community Warning System (CWS)
6) National Weather Service Radios (NWS) placed in schools, daycare centers, etc., across the county
7) Telephone Emergency Notification System (TENS) automatic dialup telephone system

SIGN-UP TO RECEIVE ALERTS: CWSALERTS.COM

Currently, the Siren System:
- Is used in the event of a chemical release,
- Is one tone,
- Consists of 22 sirens in the City of Richmond, can be heard throughout the City,
- The component NWS radios have been installed in schools, hospitals, critical facilities across the city,
- Will interface with radio/television stations & TENS,
- Will sound only in those areas that are affected by the chemical or hazardous materials release.

REMEMBER - WHEN THE SIREN SOUNDS: SHELTER - SHUT - LISTEN

GO INSIDE IMMEDIATELY
- Take loved ones/pets inside – SHELTER
- SHUT and lock all windows and doors (strengthens seals)
- Turn off heating, air conditioner and any other ventilation, close fire place dampers
- Turn on the radio or TV and LISTEN for information
- Stay off the phone if at all possible (TENS may call with further information)
- If there are gaps in the windows or doors, seal them with tape or wet towels. Larger gaps, bathroom fan grills, dryer vents, etc., may be sealed with tape and plastic sheeting or aluminum foil.
- If you suspect the chemical has entered your home, hold a wet cloth over your nose and mouth.
- Call 9-1-1 and seek medical attention as soon as possible if you have been exposed.

IF YOU CANNOT POSSIBLY GET INDOORS
- Move away from the cloud or cross-wind (so that the wind is blowing on the side of your face). This offers the best advantage for getting out of the path of a release and into a safe area.
- Children in school are safer staying in the school building.
- Schools, Hospitals and Special Facilities will be advised to enact their emergency plans.
CITY OF RICHMOND
ALERT & WARNING SYSTEMS

The City recognizes our community uses various forms of social media platforms to receive their information. Therefore, the City has implemented the following platforms to disseminate important information to our community.

Urgent, Life Threatening Information including City or Area Disasters:
(such as Shelter-In-Place or Evacuation instructions, hazardous materials releases, other actions depending on emergency)
- Nixle alert messages through text or email
- Contra Costa Community Warning System activation, KCRT TV
- All Social Media Platforms (Nextdoor, Twitter, Facebook, Instagram)

Non-Life Threatening but Important Information
(such as service disruptions, road closures, instructions to avoid an area, etc.)
- Nixle advisory messages through text or email
- All Social Media Platforms (Nextdoor, Twitter, Facebook, Instagram)

What is Nixle?
- The City of Richmond uses Nixle to communicate important, time-sensitive information to the community via live text and/or email notifications.
- Nixle notifications are generally received by subscribers within minutes.
- Nixle uses two categories of notifications, depending on the severity:
  - ALERT - Highest priority notification that is considered most urgent
  - ADVISORY - An informational or educational type of notification
- To receive both alerts & advisories through text messages, text your Richmond zip code to 888-777
- To customize the type of messages you want to receive and/or to receive them through email, sign up at www.nixle.com
- For more information, visit www.ci.richmond.ca.us/nixle

National Terrorism Advisory System (NTAS)

The color-coded federal threat levels alert system changed in 2011 to the National Terrorism Advisory System (NTAS) to more effectively communicate information about terrorist threats by providing timely, detailed information to the American public via Bulletins and Alerts. For more information, visit: www.dhs.gov/ntas

BULLETIN: Describes current developments or general trends regarding threats of terrorism

ALERTS

- Elevated Alert: Warns of a credible terrorism threat against the United States.
- Imminent Alert: Warns of a credible, specific and impending terrorism threat against the United States

What should we do when an NTAS Alert or Bulletin is announced? Encourage individuals to follow the guidance provided by state and local officials and to report suspicious activity. Where possible and applicable, NTAS advisories will include steps that individuals and communities can take to protect themselves from the threat as well as help detect or prevent an attack before it happens. Individuals should review the information contained in the Alert or Bulletin, and based upon the circumstances, take the recommended precautionary or preparedness measures for themselves and their families.

How should I report suspicious activity? Individuals should report suspicious activity to local law enforcement authorities. Often, local law enforcement and public safety officials will be best positioned to provide specific details on what indicators to look for and how to report suspicious activity. The “If You See Something, Say Something®” campaign across the United States encourages the public and leaders of communities to be vigilant for indicators of potential terroristic activity, and to follow the guidance provided by the advisory and/or state and local officials for information about threats in specific places or for identifying specific types of suspicious activity.

I get my news on-line, so how will I find out about an NTAS advisory? Go to dhs.gov/alerts to see the most recent advisories. Additionally, advisories will be sent out widely through social and mainstream media.

HOW YOU CAN HELP

- Report suspicious activity to local law enforcement who can best offer specific details on terrorist indicators.
- Report suspicious activity or information about a threat, including online activity, to fusion centers and the FBI's Field Offices – part of the Nationwide Suspicious Activity Reporting Initiative.
- Learn how to recognize signs of pre-operational planning associated with terrorism or other criminal activity.

BE PREPARED

- Be prepared for security and plan ahead. Anticipate delays and restrictions on items around populated places and at public events.
- Be responsible for your personal safety. Know where emergency exits and security personnel are located. Carry emergency contact and special needs info with you.
- Connect, Plan, Train, and Report: to prepare businesses & employees. Security tools/resources can be accessed through the DHS Hometown Security Campaign.

STAY INFORMED

- The U.S. Government will provide additional information about any emerging threat as additional information is identified. The public is encouraged to listen to local law enforcement and public safety officials.
- We urge Americans to continue to travel, attend public events, and freely associate with others but remain vigilant and aware of surroundings.
- The Department of State issues international travel alerts and warnings.
- For additional information visit Ready.gov.

If You See Something, Say Something™. Report suspicious activity to local law enforcement or call 911.

Family Emergency Plan

Make sure your family has a plan in case of an emergency. Before an emergency happens, sit down together and decide how you will get in contact with each other, where you will go and what you will do in an emergency. Keep a copy of this plan in your emergency supply kit or another safe place where you can access it in the event of a disaster.
