School-based Health Centers

School-based health centers are exactly what the name implies: the center of health in the schools where they are based.

Students and their families rely on school-based health centers to meet their needs for a full range of age-appropriate health care services, typically including:

Did You Know?

The Affordable Care Act appropriated a total of \$200 million for 2010 through 2013 to support capital grants to improve and expand services at school-based health centers.

\$95 million was awarded to 278 school based health centers in July 2011, enabling them to serve an additional 440,000 patients. They currently serve approximately 790,000.

With these funds, the school-based health centers will modernize or build new facilities, purchase much-needed equipment and increase access to health services for children.

Current
Initiatives and
Programs that
support FSCS

Friday
September 28,
2012

Dental Clinic at Peres Elementary
