

Courtland “Corky” Booze’  
Richmond Councilmember

For nearly four decades I’ve proudly promoted the needs of the people in my community.

Before I became a Councilmember I pushed for equal rights for EVERYONE in my community, good union jobs with benefits, local hire, protection for senior citizens, a clean environment, well maintained parks and safe streets.

We need businesses in Richmond that can provide good jobs with benefits and pay their fair share of the taxes. Too much of the tax burden currently rests on the shoulders of the people who can least afford it.

In this election the Chevron Modernization will be the litmus test. Yes, I support modernizing the refinery to make it a safer place to work and a neighbor that will not adversely affect the people in my community. We don’t want Chevron to close up shop but we demand that they be a better neighbor so our kids and seniors don’t have to worry about their health.

I take pride in my efforts that brought the \$300 million union built development to Terminal 1 which will bring hundreds of good jobs to Richmond residents and a tax base that will help maintain City services.

I will continue to speak for our seniors and disadvantaged that need help with their housing.

As your elected Councilmember I’ve tried to represent everyone and I can be reached night and day to listen to your concerns. I need your support to continue the work and would appreciate your vote.
