

WEBVTT

ZOOM TRANSCRIPTION AND CHAT
CITY OF RICHMOND
REDISTRICTING WORKSHOP
AUGUST 25, 2021

1
00:00:57.660 --> 00:00:58.290
Oh, not yet.

2
00:04:36.030 --> 00:04:36.990
Ursula De Loa: Are you ready to start.

3
00:04:44.100 --> 00:04:44.520
Shalice Tilton, NDC Sr. Consultant: ready.

4
00:04:45.960 --> 00:04:46.380
Reyna OrtizDeTouriel: Yes.

5
00:04:49.290 --> 00:05:02.640
Ursula De Loa: Okay, I will begin, first of all welcome to our second Community meeting or Community workshop, I will be giving some comments and I will allow time for interpreted a translated into Spanish.

6
00:05:03.810 --> 00:05:16.320
Ursula De Loa: Good evening, my name is Ursula delilah and I am the deputy city clerk for the city of Richmond on behalf of the city clerk's office i'd like to welcome you and thank you for attending our Community workshop to re establish voting districts within the city of Richmond.

7
00:05:17.910 --> 00:05:20.340
Reyna OrtizDeTouriel: (Spanish translation)

8
00:05:21.750 --> 00:05:38.850
Reyna OrtizDeTouriel: (Spanish translation)

9
00:05:40.290 --> 00:05:55.230
Ursula De Loa: The city clerk's office would like to thank the office of the mayor city manager and city attorney as well as our it case, your tea and community services departments for support with this process and they now are these that tour yell we're providing translation services.

10
00:05:56.220 --> 00:05:59.580
Reyna OrtizDeTouriel: (Spanish translation)

11
00:06:01.020 --> 00:06:10.020
Reyna OrtizDeTouriel: (Spanish translation)

12
00:06:11.850 --> 00:06:21.720

Ursula De Loa: So he's tilton from national demographic consultants, where we workshop all presentations from previous public hearings are currently on the city clerk's redistricting web page.

13

00:06:23.220 --> 00:06:39.600

Reyna OrtizDeTouriel: (Spanish translation)

14

00:06:40.890 --> 00:06:43.530

Reyna OrtizDeTouriel: (Spanish translation)

15

00:06:46.020 --> 00:06:54.150

Ursula De Loa: We ask that you please kindly use the zoom raise hand feature So if you have any questions and questions will be addressed at the end of the presentation.

16

00:06:54.750 --> 00:07:10.110

Ursula De Loa: For those of you with questions that dialed in by phone you'll need to press star nine on your phone to raise your hand and star six to unmute Spanish translation is available and can be accessed by selecting the interpretation button in zoom.

17

00:07:13.380 --> 00:07:32.070

Reyna OrtizDeTouriel: (Spanish translation)

18

00:07:33.270 --> 00:07:45.150

Reyna OrtizDeTouriel: (Spanish translation)

19

00:07:45.960 --> 00:07:53.820

Reyna OrtizDeTouriel: (Spanish translation)

20

00:07:54.210 --> 00:08:03.060

Reyna OrtizDeTouriel: (Spanish translation)

21

00:08:03.600 --> 00:08:17.580

Reyna OrtizDeTouriel: (Spanish translation)

22

00:08:18.750 --> 00:08:19.(Spanish translation)

23

00:08:20.190 --> 00:08:30.630

Ursula De Loa: Our second record public hearing regarding redistricting is scheduled for Tuesday September 14 2021 City Council meeting from 7pm via zoom.

24

00:08:35.730 --> 00:08:36.090

Reyna OrtizDeTouriel: (Spanish translation)

25

00:08:37.320 --> 00:08:48.930

Reyna OrtizDeTouriel: (Spanish translation)

26

00:08:50.910 --> 00:08:52.590

Reyna OrtizDeTouriel: (Spanish translation)

27

00:08:52.800 --> 00:08:54.150

Reyna OrtizDeTouriel: (Spanish translation)

28

00:08:55.980 --> 00:09:10.260

Ursula De Loa: The published agenda will have information on how to participate Spanish translation services will be available at all redistricting public hearings translation for other languages may be available, upon request prior to the day of the hearing.

29

00:09:14.910 --> 00:09:15.390

Reyna OrtizDeTouriel: (Spanish translation)

30

00:09:17.490 --> 00:09:38.940

Reyna OrtizDeTouriel: (Spanish translation)

31

00:09:40.260 --> 00:09:44.760

Ursula De Loa: Now i'll turn the presentation over to sleep to begin, thank you.

32

00:09:45.180 --> 00:09:52.890

Reyna OrtizDeTouriel: (Spanish translation)

33

00:09:55.410 --> 00:10:00.870

Reyna OrtizDeTouriel: (Spanish translation)

34

00:10:04.530 --> 00:10:06.420

Reyna OrtizDeTouriel: (Spanish translation)

35

00:10:17.700 --> 00:10:30.000

Shalice Tilton, NDC Sr. Consultant: Good afternoon, my name is Shalice Tilton and tonight, our our goal is to give you an introduction to redistricting specifically.

36

00:10:30.510 --> 00:10:45.270

Shalice Tilton, NDC Sr. Consultant: Some of the requirements that we must follow in redistricting and the timeline for redistricting and then we want to spend the second half, talking about mapping tools to allow the public the opportunity to draw their own.

37

00:10:53.460 --> 00:11:06.510

Shalice Tilton, NDC Sr. Consultant: The process is guided by the fair maps Act and the fair match act requires that the city holds a minimum of four public hearings before the final map is chosen.

38

00:11:07.530 --> 00:11:12.960

Shalice Tilton, NDC Sr. Consultant: The city has already held his first pre draft snap hearing on July six.

39

00:11:14.190 --> 00:11:17.340

Shalice Tilton, NDC Sr. Consultant: It will hold second theory on Sep tember 19th.

40

00:11:21.750 --> 00:11:37.080

Shalice Tilton, NDC Sr. Consultant: And we're having today's public workshop we had one at two o'clock this afternoon and tonight at six o'clock the workshops are recorded So anyone who has any bill to attend live can watch the recorded workshop on the city's website.

41

00:11:38.280 --> 00:11:45.630

Shalice Tilton, NDC Sr. Consultant: it's the normal city website address forward slash redistricting will get you to the appropriate page.

42

00:11:48.000 --> 00:11:51.060

Shalice Tilton, NDC Sr. Consultant: As most of you know, the census data was delayed.

43

00:11:52.200 --> 00:11:55.440

Shalice Tilton, NDC Sr. Consultant: We did get raw data on August 12.

44

00:11:56.730 --> 00:12:08.610

Shalice Tilton, NDC Sr. Consultant: It was given to the state in what is called legacy format which required sensitive reformatting into a usable database and the state is now finishing that process.

45

00:12:12.030 --> 00:12:21.180

Shalice Tilton, NDC Sr. Consultant: Now the state is required to take that official data and zero out all the populations from the state prisons.

46

00:12:22.350 --> 00:12:26.340

Shalice Tilton, NDC Sr. Consultant: They will then reassign the prisoners to their home addresses.

47

00:12:28.410 --> 00:12:36.930

Shalice Tilton, NDC Sr. Consultant: And then we will have the official census data that we will use in the state of California for each jurisdiction to do redistricting.

48

00:12:38.280 --> 00:12:47.400

Shalice Tilton, NDC Sr. Consultant: Once that official data is released, there will be a three week waiting period before the city or the city's consultant can release any maps.

49

00:12:50.160 --> 00:12:56.910

Shalice Tilton, NDC Sr. Consultant: than this, then the public will have the opportunity to use the mapping tools to begin drawing maps.

50

00:12:59.460 --> 00:13:04.440

Shalice Tilton, NDC Sr. Consultant: The first opportunity for the Council to discuss those maps will be march 1.

51

00:13:05.640 --> 00:13:11.640

Shalice Tilton, NDC Sr. Consultant: And then they will revisit the maps on April 5 with the goal of a doctrinal final map Clemente.

52

00:13:13.260 --> 00:13:16.830

Shalice Tilton, NDC Sr. Consultant: The deadline, the state deadline to adopt the map is April 17.

53

00:13:22.080 --> 00:13:38.670

Shalice Tilton, NDC Sr. Consultant: There are Federal and State laws that we must follow when we are dry mats the first the federal law is equal population in each of the six districts it doesn't have to be exact population, but it has to be near equal.

54

00:13:40.740 --> 00:13:50.820

Shalice Tilton, NDC Sr. Consultant: It is acceptable to have a difference of about 10% between the least populated and the clan the highest populated districts.

55

00:13:54.000 --> 00:14:05.820

Shalice Tilton, NDC Sr. Consultant: We also must follow the federal voting rights act, meaning that we cannot drive districts, that would be drawn in a way to dilute the voting strength of our protected class citizens.

56

00:14:07.560 --> 00:14:15.780

Shalice Tilton, NDC Sr. Consultant: And no racial gerrymandering, this means that districts cannot be drawn with the soul and predominant.

57

00:14:18.720 --> 00:14:24.030

Shalice Tilton, NDC Sr. Consultant: Factor being race, we also need to consider other factors such as.

58

00:14:25.080 --> 00:14:32.910

Shalice Tilton, NDC Sr. Consultant: shared culture shared history share social networks shared languages spoken spoken at home.

59

00:14:34.080 --> 00:14:43.380

Shalice Tilton, NDC Sr. Consultant: So all those various things need to be considered, in addition to race, it cannot be the only factor when you're driving the boundaries.

60

00:14:45.120 --> 00:15:05.880

Shalice Tilton, NDC Sr. Consultant: In the middle column is the state or the state laws spelled out by the fair math facts, and these are in orders of order of priority, the first priority is that each of the districts must be geographically contiguous that means one single district must have one single solid boundary.

61

00:15:07.560 --> 00:15:11.610

Shalice Tilton, NDC Sr. Consultant: Second, and divided neighborhoods and communities of interest.

62

00:15:13.200 --> 00:15:17.190

Shalice Tilton, NDC Sr. Consultant: Those neighborhoods and communities of interest that share socio economic.

63

00:15:18.450 --> 00:15:24.810

Shalice Tilton, NDC Sr. Consultant: common interests and that are in a geographically concentrated area.

64

00:15:26.340 --> 00:15:32.880

Shalice Tilton, NDC Sr. Consultant: needs to be considered and needs to be considered if they should be kept together for their fair and equitable representation.

65

00:15:37.080 --> 00:15:40.620

Shalice Tilton, NDC Sr. Consultant: The third is easily identifiable boundaries.

66

00:15:42.120 --> 00:15:48.180

Shalice Tilton, NDC Sr. Consultant: So we as as much as is practical to follow streets railroads.

67

00:15:49.680 --> 00:16:01.410

Shalice Tilton, NDC Sr. Consultant: Major landmarks he maybe if there's a hillside anything that you're able to actually identify the boundaries of your borders or verbalize the boundaries of your borders.

68

00:16:03.540 --> 00:16:18.930

Shalice Tilton, NDC Sr. Consultant: And then the fourth criteria is compactness, and this means not necessarily the shape, for the size, but this does mean you do not bypass one group of people to get to a more distant group of people and you're trying to single district.

69

00:16:20.100 --> 00:16:24.570

Shalice Tilton, NDC Sr. Consultant: And we cannot charge district boundaries to favor or discriminate against the political party.

70

00:16:26.970 --> 00:16:47.070

Shalice Tilton, NDC Sr. Consultant: Once we've met the federal and the State criteria we can consider other traditional principles such as minimizing the voters that are shifted to different election years, for example in 2022 those citizens who reside in districts to four and five are expecting two votes.

71

00:16:48.120 --> 00:16:57.390

Shalice Tilton, NDC Sr. Consultant: When we redraw there will be some adjustments of the boundaries, and we want to minimize the number of voters were shifted from 2022 years which will be 24 year.

72

00:16:59.370 --> 00:17:08.730

Shalice Tilton, NDC Sr. Consultant: If we met all the prioritize criteria, we can also consider respective folders choices and avoid head to head contest between incumbents.

73

00:17:09.870 --> 00:17:13.620

Shalice Tilton, NDC Sr. Consultant: If it's possible to do so, we would accept that option in a map.

74

00:17:15.120 --> 00:17:23.820

Shalice Tilton, NDC Sr. Consultant: We can consider future population growth, however, we are limited again to that 10% no more than 10% deviation.

75

00:17:25.590 --> 00:17:35.640

Shalice Tilton, NDC Sr. Consultant: And then for serving the core of the existing districts is is often a consideration because folks are accustomed to the new districts and.

76

00:17:37.020 --> 00:17:43.650

Shalice Tilton, NDC Sr. Consultant: Preserving those course is not required, but it's often considered as a traditional principle.

77

00:17:47.610 --> 00:17:55.680

Shalice Tilton, NDC Sr. Consultant: Because we don't have the official census data, and we will not have it until October and DC has provided some estimates.

78

00:17:56.760 --> 00:17:59.580

Shalice Tilton, NDC Sr. Consultant: of what we think the those totals will come will be.

79

00:18:00.600 --> 00:18:21.840

Shalice Tilton, NDC Sr. Consultant: And with the estimates, we believe the total population, and this is all people, including non citizens and US citizens is 111,000 98 people, so if we divide that by six in each of the districts, there needs to be about 18,516 people.

80

00:18:24.930 --> 00:18:39.570

Shalice Tilton, NDC Sr. Consultant: I want to call your attention to the bottom, the bottom category, which is the citizen voting age population, this represents US citizens who reside within the city boundaries, who are 18 years of age or older.

81

00:18:41.010 --> 00:18:54.360

Shalice Tilton, NDC Sr. Consultant: And we listed for you some proportions of the populations of those 18 years and older for US citizens, broken down by race race and ethnicity.

82

00:18:55.980 --> 00:18:57.690

Shalice Tilton, NDC Sr. Consultant: See the first one is Hispanic.

83

00:18:58.830 --> 00:19:17.580

Shalice Tilton, NDC Sr. Consultant: And just as a side note former speaking of Hispanic Hispanic and Latino six or Latino are interchangeable terms, because the census bureau when they're on this questionnaire asks the question are you Hispanic or Latino so they are grouped together.

84

00:19:19.380 --> 00:19:22.500

Shalice Tilton, NDC Sr. Consultant: So when we talk Hispanic or Latino it's one in the same.

85

00:19:25.020 --> 00:19:36.030

Shalice Tilton, NDC Sr. Consultant: You can see that, when you see the higher proportions of a particular class, for example, district one we have 53% Hispanic citizen voting age population.

86

00:19:37.110 --> 00:19:46.110

Shalice Tilton, NDC Sr. Consultant: This is often an indicator if the districts were drawn in a matter that respects geographically concentrated areas of a protected class.

87

00:19:51.510 --> 00:20:03.210

Shalice Tilton, NDC Sr. Consultant: What i'm showing here on the screen now is a depiction of a demographic map that shows those concentrated areas of our citizen voting age population for our Latino community.

88

00:20:04.080 --> 00:20:20.400

Shalice Tilton, NDC Sr. Consultant: And when i'm showing the colors that you want to see are the green the yellow and the kinks those are the higher concentration areas and you see, most of them are in district one and they're particularly concentrated between some Pablo and I five eight.

89

00:20:23.220 --> 00:20:33.330

Shalice Tilton, NDC Sr. Consultant: This is a similar map showing the Asian American citizen voting age population, we see concentrations around the country club can hilltop village.

90

00:20:34.380 --> 00:20:36.960

Shalice Tilton, NDC Sr. Consultant: In the hills of so prostate and yeast.

91

00:20:38.070 --> 00:20:40.740

Shalice Tilton, NDC Sr. Consultant: And along the border with Elsa retail in the south.

92

00:20:45.000 --> 00:20:56.640

Shalice Tilton, NDC Sr. Consultant: For African African American citizen voting age population, we see particular concentrations in hilltop and the higher triangle and between Ohio avenue and ice baby.

93

00:21:02.310 --> 00:21:10.260

Shalice Tilton, NDC Sr. Consultant: So we are asking the Community to let us know what is your neighborhood and what are the geographical boundaries of the neighborhood.

94

00:21:10.830 --> 00:21:23.550

Shalice Tilton, NDC Sr. Consultant: An example of how you would describe your neighborhood is tell us what the dividing lines are are they highways major roads rivers canals or skills or they areas around the park for other men mark.

95

00:21:24.750 --> 00:21:41.730

Shalice Tilton, NDC Sr. Consultant: We can also look at certain planning records, we do have information on the different neighborhoods but sometimes those those neighborhoods as defined by the planning department or in the planning records are a little bit different than the reality of those living in the neighborhood.

96

00:21:42.810 --> 00:21:52.170

Shalice Tilton, NDC Sr. Consultant: So we We definitely want to hear from those residents who live in those neighborhoods describe what your geographical boundaries are so that we can take that into consideration when we're trying.

97

00:21:55.290 --> 00:22:03.270

Shalice Tilton, NDC Sr. Consultant: Beyond neighborhoods we also want to hear what defines your Community so rather than sometimes it's not always a.

98

00:22:03.780 --> 00:22:16.710

Shalice Tilton, NDC Sr. Consultant: neighborhood per se, but rather there are shared characteristics of a certain group of people have in common, and these group of people, happen to be in a certain geographic area, some of those interests could be.

99

00:22:17.790 --> 00:22:30.030

Shalice Tilton, NDC Sr. Consultant: concerns with public safety, environmental concerns traffic concerns housing or areas that are impacted by city or even county policies.

100

00:22:31.740 --> 00:22:41.400

Shalice Tilton, NDC Sr. Consultant: Once you've defined that Community then we ask the second question, but that Community benefit from being in a single district for purposes of its effective and fair representation.

101

00:22:42.120 --> 00:22:51.720

Shalice Tilton, NDC Sr. Consultant: Or would it be well served by having multiple representatives, maybe that perhaps there are more than one Council district that touches that community.

102

00:22:55.710 --> 00:23:10.980

Shalice Tilton, NDC Sr. Consultant: we do now have a definition of community of interest in your elections code that community of interest is a population that shares common social or economic interests that should be included within single district for purposes of its effective and fair representation.

103

00:23:12.090 --> 00:23:21.780

Shalice Tilton, NDC Sr. Consultant: And just as a reminder communities of interest, do not include relationships with political parties and happens for political candidates.

104

00:23:25.110 --> 00:23:30.660

Shalice Tilton, NDC Sr. Consultant: city is offering public mapping tools, because we want the public to participate and to draw them that.

105

00:23:31.350 --> 00:23:47.400

Shalice Tilton, NDC Sr. Consultant: This is one of the best ways, you can tell us about your communities is to actually draw a map what you think should be included in the single district, so we have various tools for you to use i'm going to quickly run through this PowerPoint just very quickly Just to give you a.

106

00:23:48.540 --> 00:24:00.120

Shalice Tilton, NDC Sr. Consultant: glimpse at the tools, but I will be next switching over to the website, because I think it's important that you learn how to navigate the website so you're able to access these tools.

107

00:24:02.130 --> 00:24:11.550

Shalice Tilton, NDC Sr. Consultant: However, whatever tool you end up using, whether it be one of our paper tools or our simple paint brush tool or the most powerful draft than that tool.

108

00:24:12.450 --> 00:24:27.180

Shalice Tilton, NDC Sr. Consultant: Every tool we want any tool that you have you can even use your own map, you can use, for example, a Chamber of Commerce map for a local neighborhood map that you happen to have any map, you have you can view it can submit to us.

109

00:24:28.410 --> 00:24:30.960

Shalice Tilton, NDC Sr. Consultant: And we will professionally produced every map.

110

00:24:32.130 --> 00:24:45.390

Shalice Tilton, NDC Sr. Consultant: So every map will be treated anybody weighted equally, they will be produced similar to this math this happens to be the map that was adopted and honey, who is each map will be given the number of this one was given the number of.

111

00:24:47.160 --> 00:24:52.350

Shalice Tilton, NDC Sr. Consultant: This be tells me that 115 started out looking a little bit differently than.

112

00:24:53.400 --> 00:24:59.700

Shalice Tilton, NDC Sr. Consultant: And the Council after looking at it asked for a few changes so it became likely matt.

113

00:25:01.200 --> 00:25:02.910

Shalice Tilton, NDC Sr. Consultant: And then be.

114

00:25:03.960 --> 00:25:15.840

Shalice Tilton, NDC Sr. Consultant: So we keep every math is submitted every map always remains in consideration if you happen to submit a map that is not population balanced or happens to omit an area.

115

00:25:16.650 --> 00:25:32.100

Shalice Tilton, NDC Sr. Consultant: So it has some areas that are not included, for you have non contiguous orders, then we would still produce the map it's just we would make a notation of large notation on there that it that it is.

116

00:25:33.330 --> 00:25:34.710

Shalice Tilton, NDC Sr. Consultant: Has these certain.

117

00:25:36.870 --> 00:25:41.460

Shalice Tilton, NDC Sr. Consultant: features that needs to be corrected, if the map, if the Council wanted to adopt that now.

118

00:25:43.410 --> 00:25:54.240

Shalice Tilton, NDC Sr. Consultant: With each math we include a demographic summary this demographic summary gives the total population of each of the districts and it also gives that proportional breakdown.

119

00:25:54.540 --> 00:26:04.530

Shalice Tilton, NDC Sr. Consultant: of your citizen voting age population population by race and ethnicity so give the percentage for each of the districts and that's good indicator of.

120

00:26:05.010 --> 00:26:11.610

Shalice Tilton, NDC Sr. Consultant: If you have some higher percentages and certain districts, we also include voter registration and voter turnout.

121

00:26:12.360 --> 00:26:22.350

Shalice Tilton, NDC Sr. Consultant: that's often helps to define a certain community of interest, you will definitely have some areas that have higher voter turnout and some areas that have low and so we're fortunate.

122

00:26:23.880 --> 00:26:32.940

Shalice Tilton, NDC Sr. Consultant: We include other socio economic data, such as age, immigration status language spoken at home language fluency.

123

00:26:33.990 --> 00:26:37.560

Shalice Tilton, NDC Sr. Consultant: education levels household income housing status.

124

00:26:38.580 --> 00:26:45.210

Shalice Tilton, NDC Sr. Consultant: Well, let me just show you quickly these slides don't panic i'm going to go to the website and we're going to go over these 30.

125

00:26:45.960 --> 00:26:59.010

Shalice Tilton, NDC Sr. Consultant: We have a review map kid is called our online interactive Q math I will show you how that works, and we have paper clips kits for those who do not want to use the computer we provide population counts for you.

126

00:27:00.900 --> 00:27:08.970

Shalice Tilton, NDC Sr. Consultant: Yes, you want to use a paper map, but you don't want to use a calculator to see if your districts are balanced we offer excel supplement to go with it.

127

00:27:12.630 --> 00:27:28.440

Shalice Tilton, NDC Sr. Consultant: We have a new tool that is fun and easy to use, I think that will find a lot of people will be using this one, it works very much like a paintbrush and you'll go in and paint the various census blocks to build a district for neighborhood.

128

00:27:30.630 --> 00:27:40.260

Shalice Tilton, NDC Sr. Consultant: And then we have the most powerful the calipers magnitude online redistricting tool, and this will be available after the official census data is.

129

00:27:41.640 --> 00:27:46.560

Shalice Tilton, NDC Sr. Consultant: i'm going to go ahead and switch my sharing to the website.

130

00:28:05.970 --> 00:28:24.090

Shalice Tilton, NDC Sr. Consultant: When you first go to the city's website at [ci Doc richmond@ca.us](http://ci.Docrichmond@ca.us) slash redistricting it will lead you to this page this happens to be a page under the city parks department.

131

00:28:27.240 --> 00:28:33.090

Shalice Tilton, NDC Sr. Consultant: The first part of it shows about today's flyer or a flyer about today's workshop.

132

00:28:34.800 --> 00:28:38.130

Shalice Tilton, NDC Sr. Consultant: And then most recent information is listed first.

133

00:28:41.970 --> 00:28:46.560

Shalice Tilton, NDC Sr. Consultant: And then we get down to the basics of the website.

134

00:28:48.270 --> 00:28:55.230

Shalice Tilton, NDC Sr. Consultant: You can see that we have just an overview of the redistricting process, we have a schedule of the upcoming meetings.

135

00:28:55.800 --> 00:29:07.200

Shalice Tilton, NDC Sr. Consultant: Once draft maps are submitted, we will list the Jackson Apps here, they will be in PDF format so you'd be able to look at them in PDF format and you'll also be able to look at the demographics summary for each of them.

136

00:29:08.970 --> 00:29:20.520

Shalice Tilton, NDC Sr. Consultant: We have our draw a map we're going to go into detail into that one contact us and other documents that relate to the redistricting process I selected the draw a map but.

137

00:29:25.650 --> 00:29:38.910

Shalice Tilton, NDC Sr. Consultant: And we have all the different tools, this is we start with the most easy the easy tool, the paper tool, the paper tool with the excel spreadsheet district are, which is that paint brush tool.

138

00:29:39.750 --> 00:29:57.360

Shalice Tilton, NDC Sr. Consultant: And then be coming soon will be them aptitude online for redistricting and the interactive with you now i'm actually going to start and then story map will be coming soon that's also just a viewing resource for you have various kind of the jurisdiction.

139

00:29:58.440 --> 00:30:00.990

Shalice Tilton, NDC Sr. Consultant: we're going to start with this interactive review map.

140

00:30:02.340 --> 00:30:06.360

Shalice Tilton, NDC Sr. Consultant: To even select this link that will lead you right to it, I already had an open.

141

00:30:07.710 --> 00:30:16.500

Shalice Tilton, NDC Sr. Consultant: When you open it up, it gives you just some quick interactive with you matt instructions on how to navigate around i'm going to go ahead and close that.

142

00:30:18.540 --> 00:30:27.210

Shalice Tilton, NDC Sr. Consultant: In the upper left hand corner, you have your zoom features to either press the plus to zoom in or the minus to zoom out.

143

00:30:29.040 --> 00:30:33.870

Shalice Tilton, NDC Sr. Consultant: And then we have the legend those shows the color of the districts.

144

00:30:35.670 --> 00:30:47.520

Shalice Tilton, NDC Sr. Consultant: i'm clicking on layers right now, it will show me which maps are available now as matt start to get submitted over on this right hand side under layers they will also be listed under layers.

145

00:30:48.120 --> 00:31:00.570

Shalice Tilton, NDC Sr. Consultant: But for now we have the current districts that happens to be what i'm showing you, and then we have census blocks, and I want to show you why census blocks are important, we also have.

146

00:31:02.550 --> 00:31:08.850

Shalice Tilton, NDC Sr. Consultant: Three maps that go along with the paper tools and i'll show you how those.

147

00:31:10.140 --> 00:31:13.920

Shalice Tilton, NDC Sr. Consultant: just want to point out, you can change the base map salary.

148

00:31:15.000 --> 00:31:16.560

Shalice Tilton, NDC Sr. Consultant: You can change it to show.

149

00:31:18.030 --> 00:31:18.720

Shalice Tilton, NDC Sr. Consultant: imagery.

150

00:31:22.980 --> 00:31:24.060

Shalice Tilton, NDC Sr. Consultant: Just streets.

151

00:31:25.980 --> 00:31:26.850

Shalice Tilton, NDC Sr. Consultant: typography.

152

00:31:28.290 --> 00:31:32.430

Shalice Tilton, NDC Sr. Consultant: A light Gray canvas that shows it's so it's less busy.

153

00:31:36.450 --> 00:31:42.270

Shalice Tilton, NDC Sr. Consultant: You can play around with any of these you can't hurt for change this tool, so you can play around as much as you want.

154

00:31:48.960 --> 00:31:51.210

Shalice Tilton, NDC Sr. Consultant: This just shows you the entire map.

155

00:31:54.480 --> 00:32:04.650

Shalice Tilton, NDC Sr. Consultant: Measuring is not particularly used you're able to print it and share sharing your your map actually sharing gives you sharing shares this tool.

156

00:32:06.090 --> 00:32:06.810

Shalice Tilton, NDC Sr. Consultant: To layers.

157

00:32:09.870 --> 00:32:11.340

Shalice Tilton, NDC Sr. Consultant: me show you i'm going to.

158

00:32:12.630 --> 00:32:15.030

Shalice Tilton, NDC Sr. Consultant: zoom in more closely to particular area.

159

00:32:22.050 --> 00:32:24.210

Shalice Tilton, NDC Sr. Consultant: And I want to show you a sense of blocks.

160

00:32:27.300 --> 00:32:29.580

Shalice Tilton, NDC Sr. Consultant: So, as you will see, on your screen.

161

00:32:30.750 --> 00:32:37.170

Shalice Tilton, NDC Sr. Consultant: All the census blocks and these is it, this is the smallest geography used by the census bureau.

162

00:32:38.310 --> 00:32:47.790

Shalice Tilton, NDC Sr. Consultant: oftentimes they follow what you would consider a normal street block and within this block to give you the count of the number of people living within that blah.

163

00:32:48.900 --> 00:33:09.330

Shalice Tilton, NDC Sr. Consultant: So this we add up essentially all these street blocks to get the total count for each of the population for each of the districts and, eventually, you would have one entire district that has 18,516 so you can imagine how difficult it would be to have to add up all of these figures.

164

00:33:11.280 --> 00:33:26.400

Shalice Tilton, NDC Sr. Consultant: So we've made it a little bit easier for those who are using the paper maps rather than have to add up all of these numbers we've created groups of population units i'm going to activate now the population units.

165

00:33:30.750 --> 00:33:43.260

Shalice Tilton, NDC Sr. Consultant: So you can see, in purple we have grouped together the population units, so all of these in this particular square this yellow square add up to 1016.

166

00:33:44.400 --> 00:33:44.850

Shalice Tilton, NDC Sr. Consultant: People.

167

00:33:47.160 --> 00:33:56.580

Shalice Tilton, NDC Sr. Consultant: This is good for you to know, because some folks will say don't really like how you created the population unit, I wanted to follow.

168

00:33:57.210 --> 00:34:06.000

Shalice Tilton, NDC Sr. Consultant: A different street than what you follow and that's fine on your paper map just simply draw your map along the street that you wanted to follow.

169

00:34:06.390 --> 00:34:12.900

Shalice Tilton, NDC Sr. Consultant: And then just make a little note that you follow give us the name of the street, and then we can create your map for you.

170

00:34:13.650 --> 00:34:24.420

Shalice Tilton, NDC Sr. Consultant: If you activate this tool, you can see what population numbers are going to be impacted if you've divided one of these population units differently than what we did on the paper now.

171

00:34:26.250 --> 00:34:41.430

Shalice Tilton, NDC Sr. Consultant: Another reason why I like to show this map to you is because you'll see that population census blocks sometimes have very funny shapes so i'm going to undo the population units i'm just showing the census blocks right now.

172

00:34:42.630 --> 00:34:48.570

Shalice Tilton, NDC Sr. Consultant: But you can see, this shape of this census block traps, all the way around this particular area.

173

00:34:50.850 --> 00:35:01.590

Shalice Tilton, NDC Sr. Consultant: So with any of the map drawing tools, when you touch this part of the map it's going to highlight all of the census block, because we have to follow the census block geography.

174

00:35:03.750 --> 00:35:21.570

Shalice Tilton, NDC Sr. Consultant: That is good information to know, because sometimes it will seem frustrating to you if you're trying to draw a map and say your line is going through one of these odd shaped census blocks and it's highlighting all of it is because we must follow the census block geography.

175

00:35:23.100 --> 00:35:27.960

Shalice Tilton, NDC Sr. Consultant: And sometimes the very long and skinny census blocks, like this one.

176

00:35:31.770 --> 00:35:40.380

Shalice Tilton, NDC Sr. Consultant: The other thing that's useful for being able to look at these population units on this map is because you can see the street names.

177

00:35:43.200 --> 00:35:56.460

Shalice Tilton, NDC Sr. Consultant: In addition to the population counts, we also have the the map that shows each of the population units me get back to population labels let's undo census blocks.

178

00:35:58.200 --> 00:36:05.970

Shalice Tilton, NDC Sr. Consultant: Here are the population units that show the population counts i'm going to now activate just the iits.

179

00:36:08.010 --> 00:36:09.150

Shalice Tilton, NDC Sr. Consultant: And do this so.

180

00:36:10.350 --> 00:36:22.350

Shalice Tilton, NDC Sr. Consultant: What we've done with the population unit map that we've created for you we've also created a second one that has numerically number all the population units.

181

00:36:23.520 --> 00:36:32.640

Shalice Tilton, NDC Sr. Consultant: And you'll understand why, when I show you the paper kit, but that is used, so you can, if you want to use excel to help add the population counts for you.

182

00:36:35.760 --> 00:36:39.690

Shalice Tilton, NDC Sr. Consultant: hey and then to get back to the original screen you press the home button.

183

00:36:42.450 --> 00:36:51.030

Shalice Tilton, NDC Sr. Consultant: We go back to the website that's that's the interactive map fewer and again, as I mentioned once draft maps gets submitted they'll be populated here.

184

00:36:56.010 --> 00:36:56.910

Shalice Tilton, NDC Sr. Consultant: The next tool.

185

00:36:58.140 --> 00:36:58.950

Shalice Tilton, NDC Sr. Consultant: I want to show you.

186

00:37:00.630 --> 00:37:08.640

Shalice Tilton, NDC Sr. Consultant: we've covered the first one is this public participation fit let's see what it looks like.

187

00:37:16.800 --> 00:37:17.730

spring the spring down.

188

00:37:21.150 --> 00:37:21.420

Okay.

189

00:37:23.520 --> 00:37:29.190

Shalice Tilton, NDC Sr. Consultant: This is what the paper when you print it out looks like or you can pick it up from city clerk department.

190

00:37:30.240 --> 00:37:34.080

Shalice Tilton, NDC Sr. Consultant: And you can use this kit to actually just draw a solid.

191

00:37:35.340 --> 00:37:38.790

Shalice Tilton, NDC Sr. Consultant: thick or colored border of where you want your district to be.

192

00:37:40.110 --> 00:37:47.010

Shalice Tilton, NDC Sr. Consultant: And then you would separately calculate all the population counts, that are in each of these population units.

193

00:37:48.060 --> 00:37:52.350

Shalice Tilton, NDC Sr. Consultant: and get to your ideal population of 18,516.

194

00:37:53.880 --> 00:37:57.210

Shalice Tilton, NDC Sr. Consultant: that's the simplest way of submitting a map.

195

00:37:58.650 --> 00:37:59.040

Shalice Tilton, NDC Sr. Consultant: Okay.

196

00:38:00.360 --> 00:38:01.080

Shalice Tilton, NDC Sr. Consultant: let's go back.

197

00:38:04.080 --> 00:38:10.860

Shalice Tilton, NDC Sr. Consultant: The other way, if you don't want to do the calculation yourself is once you've drawn your map.

198

00:38:14.040 --> 00:38:36.780

Shalice Tilton, NDC Sr. Consultant: You can use this map that has all of those population new units numbered consecutively so over here in the eastern most eastern part of the city, you can see these population units are number 1234 568-910-1112 13.

199

00:38:39.210 --> 00:38:39.630

let's.

200

00:38:40.830 --> 00:38:50.280

Shalice Tilton, NDC Sr. Consultant: let's start with 13 and then let's do 1718 1920 I think that will get us close to a part of what the original math is.

201

00:38:53.190 --> 00:38:56.520

Shalice Tilton, NDC Sr. Consultant: So the way you work it is after you.

202

00:38:57.570 --> 00:39:00.240

Shalice Tilton, NDC Sr. Consultant: draw on your map on here you go to your excel spreadsheet.

203

00:39:02.700 --> 00:39:09.030

Shalice Tilton, NDC Sr. Consultant: Are some instructions that you can read through those and then i'm clicking on the tab at the bottom, or I need to share my screen.

204

00:39:20.100 --> 00:39:25.410

Shalice Tilton, NDC Sr. Consultant: This is the excel spreadsheet that you access from the Internet from the websites.

205

00:39:26.550 --> 00:39:32.190

Shalice Tilton, NDC Sr. Consultant: There are some instructions on the bottom here there's three tabs i'm going to go to the second one for assignments.

206

00:39:33.120 --> 00:39:42.480

Shalice Tilton, NDC Sr. Consultant: And here we have all those population unit numbers all the ID numbers are listed and next to them is that all the pocket total population for each of those ID numbers.

207

00:39:43.230 --> 00:39:49.650

Shalice Tilton, NDC Sr. Consultant: So I want to assign a district to those population units that I just called out so i'm going to assign them to district for.

208

00:39:54.420 --> 00:39:55.470

Shalice Tilton, NDC Sr. Consultant: The skip seven.

209

00:39:59.550 --> 00:40:03.540

Shalice Tilton, NDC Sr. Consultant: And then I think we went to I can't remember but i'm just going to for.

210

00:40:07.080 --> 00:40:10.440

Shalice Tilton, NDC Sr. Consultant: going to skip 1415 and 16 so disseminating the nights.

211

00:40:11.610 --> 00:40:26.940

Shalice Tilton, NDC Sr. Consultant: going to see what my results are to see how well I did it getting close to population balance, I have a sneak peek a quick reference up here from my district, for it shows me i'm slightly under populated by that by 2000.

212

00:40:27.780 --> 00:40:33.570

Shalice Tilton, NDC Sr. Consultant: So let's go ahead and add these 16 and 17 i'm not even sure if 16 and 17 are close but.

213

00:40:35.520 --> 00:40:44.700

Shalice Tilton, NDC Sr. Consultant: But you would be referring to your map before you would just randomly assigned numbers refer to your map and see what those population numbers are it.

214

00:40:45.960 --> 00:40:47.700

Shalice Tilton, NDC Sr. Consultant: switch over to the results page.

215

00:40:49.140 --> 00:40:59.250

Shalice Tilton, NDC Sr. Consultant: And the results page, of course, I only have district four built out but it shows me, I am close to being populated i'm still short.

216

00:40:59.790 --> 00:41:20.040

Shalice Tilton, NDC Sr. Consultant: Or am I over sorry i'm over so I got too many people in this district i'm over by about 12.2% which is completely not acceptable, so I definitely need to go back and revise that so that we are less than 10%.

217

00:41:21.330 --> 00:41:23.550

Shalice Tilton, NDC Sr. Consultant: Between the largest and smallest.

218

00:41:26.640 --> 00:41:30.720

Shalice Tilton, NDC Sr. Consultant: Once you get all of your this built out, then you can also look at.

219

00:41:31.260 --> 00:41:41.970

Shalice Tilton, NDC Sr. Consultant: Again, the citizens voting age population at the proportions for each of the districts of course I only have one district filled out, but this shows that let's look now at the not at the.

220

00:41:42.540 --> 00:41:51.420

Shalice Tilton, NDC Sr. Consultant: Non Hispanic Asian American Pacific islander population and we'll see that it's at 29% in that district for.

221

00:41:52.620 --> 00:41:52.860

OK.

222

00:41:54.030 --> 00:42:02.160

Shalice Tilton, NDC Sr. Consultant: Once you've built out your whole spreadsheet, then you can go ahead and just submit your spreadsheet and we can build them up, based on your spreadsheet.

223

00:42:04.470 --> 00:42:17.430

Shalice Tilton, NDC Sr. Consultant: This spreadsheet option is usually only used by those people who are already familiar with excel it's probably not worth it, to learn excel to do this, but those people that like excel really like this map.

224

00:42:18.750 --> 00:42:22.200

Shalice Tilton, NDC Sr. Consultant: Let me go back to the spreadsheet to our website now.

225

00:42:31.830 --> 00:42:46.140

Shalice Tilton, NDC Sr. Consultant: So we talked about both the paper kits the one that just has a population count the one that has the unit ids that you use with the excel spreadsheet and now I want to talk about district our district are not drawing tool.

226

00:42:50.550 --> 00:43:04.020

Shalice Tilton, NDC Sr. Consultant: When you bring it up it'll see that you're at the right page it says tag Richmond CA is automatically tags your map for you, so all the maps that are submitted for Richmond under this through the recipients website, or can be grouped together.

227

00:43:05.100 --> 00:43:11.850

Shalice Tilton, NDC Sr. Consultant: And you have the option of either join an entire map with all the districts, or you can just identify one community.

228

00:43:12.690 --> 00:43:25.230

Shalice Tilton, NDC Sr. Consultant: and actually I usually just choose this first option of all six districts it's not

mandated that you complete all six districts, but it gives you more options and flexibility than just identifying a community.

229

00:43:25.950 --> 00:43:30.750

Shalice Tilton, NDC Sr. Consultant: If you just want to do just your neighborhood This is all you care about you want to submit your neighborhood.

230

00:43:31.080 --> 00:43:44.280

Shalice Tilton, NDC Sr. Consultant: Then the the identify a community is is easy, you can also do the same thing with the with the one that's set up to build out all six districts i'm going to go ahead and select the sixth district option.

231

00:43:53.250 --> 00:43:56.880

Shalice Tilton, NDC Sr. Consultant: And here I have the outline of the city of Richmond.

232

00:43:57.990 --> 00:44:08.100

Shalice Tilton, NDC Sr. Consultant: Which showing on the right hand side it's telling me that I need to have an ideal population of 18,516 in each of the districts.

233

00:44:09.210 --> 00:44:12.690

Shalice Tilton, NDC Sr. Consultant: want to show you some other features that we have.

234

00:44:13.770 --> 00:44:22.560

Shalice Tilton, NDC Sr. Consultant: You can I went into data layers you can show the current district boundaries, if you like, you can highlight them i'm going to uncheck them for right now.

235

00:44:24.810 --> 00:44:31.830

Shalice Tilton, NDC Sr. Consultant: And you can also have additional demographics, by showing this is this happens to be showing the number of children at home.

236

00:44:32.850 --> 00:44:39.780

Shalice Tilton, NDC Sr. Consultant: Those with the darker purple have a higher percentage of households with children at home.

237

00:44:41.640 --> 00:44:48.540

Shalice Tilton, NDC Sr. Consultant: You can do it for various categories, such as those are high school graduates venter's Spanish spoken at home.

238

00:44:51.600 --> 00:44:56.520

Shalice Tilton, NDC Sr. Consultant: You can scroll through here's here's Asian languages spoken at home.

239

00:45:00.840 --> 00:45:03.180

Shalice Tilton, NDC Sr. Consultant: going to unplug it why we draw a map.

240

00:45:06.330 --> 00:45:15.480

Shalice Tilton, NDC Sr. Consultant: Okay, let me go back now to the up here I just show you the again to zoom in you on the left hand side use the plus use the minuses.

241

00:45:18.000 --> 00:45:22.620

Shalice Tilton, NDC Sr. Consultant: You can activate the pan feature to move the map around.

242

00:45:24.120 --> 00:45:27.900

Shalice Tilton, NDC Sr. Consultant: And I am going to just zoom in a little bit more closely.

243

00:45:28.950 --> 00:45:35.100

Shalice Tilton, NDC Sr. Consultant: to activate the pan feature and just move it a little bit there so that we can see this area of the map.

244

00:45:36.390 --> 00:45:54.600

Shalice Tilton, NDC Sr. Consultant: I want to draw my first district, that I was calling district poor select the color you can select the paintbrush size it starts off with a good medium size for you i'm pointing stick with that then just hold your cursor when you click on your cursor it'll start to highlight.

245

00:45:57.690 --> 00:45:58.770

Shalice Tilton, NDC Sr. Consultant: Those areas for you.

246

00:46:03.120 --> 00:46:05.400

Shalice Tilton, NDC Sr. Consultant: And it's, just like the right hand side of the screen.

247

00:46:06.630 --> 00:46:10.260

Shalice Tilton, NDC Sr. Consultant: it's showing me what my population count is as i'm highlighting.

248

00:46:29.370 --> 00:46:29.850

Shalice Tilton, NDC Sr. Consultant: You finish.

249

00:46:31.980 --> 00:46:40.920

Shalice Tilton, NDC Sr. Consultant: Close you are with the population town that's about just 300 people off so i'm going to be satisfied with that district i'm going to go to my next district Heller.

250

00:46:42.690 --> 00:46:48.540

Shalice Tilton, NDC Sr. Consultant: say this time I wanted to do the lower part of the of the city, I can use my pan feature.

251

00:46:51.480 --> 00:46:52.830

Shalice Tilton, NDC Sr. Consultant: Lower part of the city.

252

00:46:55.140 --> 00:46:58.590

Shalice Tilton, NDC Sr. Consultant: activate my paintbrush and begin to draw.

253

00:47:12.150 --> 00:47:16.200

Shalice Tilton, NDC Sr. Consultant: And I again i'm just doing this for demonstration purposes, I.

254

00:47:18.630 --> 00:47:24.660

Shalice Tilton, NDC Sr. Consultant: This is probably nonsensical ways to to be trying to map, but this gives you an idea of how it's done.

255

00:47:27.090 --> 00:47:36.660

Shalice Tilton, NDC Sr. Consultant: And once i'm sure that i'm going to lock Mike my maps I don't mess them up and you continue just to build out your map when you're done, you can select save.

256

00:47:40.620 --> 00:47:54.420

Shalice Tilton, NDC Sr. Consultant: And if you want to copy this URL that will allow you to get back to your map, you can save it as a work in progress and go back and visit it or you can go ahead and share it and when you're once you're ready to share it you're going to submit it.

257

00:47:55.470 --> 00:47:56.010

Shalice Tilton, NDC Sr. Consultant: and

258

00:47:57.120 --> 00:48:14.370

Shalice Tilton, NDC Sr. Consultant: it's already tagged as Richmond CA and then you can put in your name and put in your team name your plan name, you can name it whatever like you want to put a descriptor in it that this is, you know else also brought a focused, or what any name that you want to give your map.

259

00:48:15.960 --> 00:48:23.100

Shalice Tilton, NDC Sr. Consultant: And that's how you use the district or feature, so you can see how you could just submit your neighborhood if you're just wanting to focus on a single neighborhood.

260

00:48:25.200 --> 00:48:26.640

Shalice Tilton, NDC Sr. Consultant: Right i'm going to go back to the.

261

00:48:27.960 --> 00:48:44.280

Shalice Tilton, NDC Sr. Consultant: To the district, to the district's website, we just finished district are and then aptitude is coming online back to district are there is a map training video that's good to watch it will walk you through some of those features.

262

00:48:46.020 --> 00:49:02.700

Shalice Tilton, NDC Sr. Consultant: And then, with map to to that will be available after the tools are available, and there is a quick start guide, you can read now there's also another Matthew training video to show you how it works if you're interested in trying your hand at it, you can visit.

263

00:49:03.840 --> 00:49:11.340

Shalice Tilton, NDC Sr. Consultant: Santa Monica site and do some draw maps, you can go to the Santa Barbara county also has their site.

264

00:49:12.990 --> 00:49:15.570

Shalice Tilton, NDC Sr. Consultant: available that you can start drawing maps.

265

00:49:17.460 --> 00:49:38.370

Shalice Tilton, NDC Sr. Consultant: And then story map will be coming on to as it get maps see there's some additional resources if you want to see what the map of the existing districts, a democratic summary of the existing Council districts and then you'll be submitting your maps to city PR department@ci.richmond.ca.us.

266

00:49:39.750 --> 00:49:42.030

Shalice Tilton, NDC Sr. Consultant: And to go ahead and get back to my PowerPoint.

267

00:49:49.830 --> 00:49:59.190

Shalice Tilton, NDC Sr. Consultant: So that includes our friend through concludes our run through of the mapping tools and at this point, we want to hear from the public, we want to hear.

268

00:49:59.760 --> 00:50:09.600

Shalice Tilton, NDC Sr. Consultant: What are your neighborhoods, what are the communities of interest in your neighborhoods and what are those boundaries that helps us in knowing which neighborhoods should be kept together.

269

00:50:10.380 --> 00:50:20.640

Shalice Tilton, NDC Sr. Consultant: And then I happy to answer questions about the redistricting process and any questions about the mapping tools, if you have any questions also want to make sure that you.

270

00:50:22.080 --> 00:50:22.980

Shalice Tilton, NDC Sr. Consultant: Look at.

271

00:50:24.000 --> 00:50:35.910

Shalice Tilton, NDC Sr. Consultant: The website that, and here it is listed and again if you just go to the regular website and do forward slash redistricting that will get you there or navigate through the city parks web web page.

272

00:50:40.650 --> 00:50:54.330

Shalice Tilton, NDC Sr. Consultant: I see in this point hadn't hadn't stopped sharing my screen, so we can have some discussion and this point we will ask folks who are interested in speaking to go ahead and raise our hands.

273

00:50:59.670 --> 00:51:08.160

Shalice Tilton, NDC Sr. Consultant: And I see that we have one hand raised by Lisa Johnson, and we can promote you to panelists so you're able to ask your question.

274

00:51:09.780 --> 00:51:10.710

Leisa Johnson: hi can you hear me.

275

00:51:11.580 --> 00:51:20.760

Leisa Johnson: Yes, right, so I have lots of questions, so I don't want to hog the time, so if somebody else raises their hand, you know just let me know.

276

00:51:21.270 --> 00:51:21.600

sure.

277

00:51:22.620 --> 00:51:27.510

Leisa Johnson: So I wondered so last year I participated in every single meeting.

278

00:51:28.020 --> 00:51:41.670

Leisa Johnson: Okay, and so I know the process really well and I was actually really frustrated because I felt like the Community wasn't really heard and the City Council ended up controlling the process.

279

00:51:42.240 --> 00:52:03.390

Leisa Johnson: And I know, at the very end, there were six maps that were on the final night in January and several few of those maps I know the city Community really wanted and that's not what we got and a lot of the discussions were centered around keeping communities together of interest.

280

00:52:04.770 --> 00:52:11.460

Leisa Johnson: Because, if you look at our current map it violates three of the things that you talked about in your very first slide.

281

00:52:12.030 --> 00:52:21.750

Leisa Johnson: The Middle part about four criteria that districts should meet, which included geographically contiguous neighborhoods with common interests shouldn't be broken up.

282

00:52:22.530 --> 00:52:33.390

Leisa Johnson: And they should be compact, and if you looked at our current map district two is you know the shoreline with hilltop we have nothing in common.

283

00:52:34.260 --> 00:52:45.450

Leisa Johnson: We had asked that the shoreline Community together that didn't happen, the people in the hills, which is bifurcated by it.

284

00:52:46.200 --> 00:52:55.740

Leisa Johnson: had wanted to keep the San Pablo corridor together, and I think you were part of this process, the last time and we may remember some of these discussions, but.

285

00:52:56.580 --> 00:53:07.020

Leisa Johnson: There were several people that wanted, you know the East part of Richmond and the sand public court or to be kept together if we could and we definitely wanted the shoreline together.

286

00:53:07.530 --> 00:53:19.620

Leisa Johnson: And the maps on the final six that many in the Community had wanted were and you probably have access to these older maps were see and 114 be.

287

00:53:21.000 --> 00:53:28.980

Leisa Johnson: And those were maps that a lot of people in the Community at kept hilltop predominantly together part of it went with Elsa bronte.

288

00:53:30.000 --> 00:53:47.580

Leisa Johnson: And the San Pablo quarter was pretty I mean there was part of the shoreline and there's the northern part that wasn't exactly contiguous, but it was the best we kind of got but the shoreline was kept together and the common interest of all of those communities on the shoreline.

289

00:53:48.120 --> 00:53:53.760

Shalice Tilton, NDC Sr. Consultant: Is that in 1101 C and one one for me is that what you're doing Okay, and both of them.

290

00:53:54.090 --> 00:54:01.740

Leisa Johnson: And one one for being didn't appear until the final City Council meeting in fact it wasn't even in the final four it showed up in the final step.

291

00:54:02.610 --> 00:54:13.800

Leisa Johnson: And some of the other ones bifurcated Marina band half so people absolutely didn't want the ones where Marina Bay district was cut in half on the shoreline.

292

00:54:14.700 --> 00:54:29.430

Leisa Johnson: So that was like 103 D, I think, or something I can't remember exactly, but there was a couple different versions, but the ones that a lot in the Community really like or one one scene 114 beat and then we got 115 be and we're like what.

293

00:54:30.870 --> 00:54:41.910

Leisa Johnson: Like it just it does not keep communities of interest together at all, and so I wanted to know I mean and a lot of people last year had a really hard time with the mapping tools.

294

00:54:42.360 --> 00:54:53.220

Leisa Johnson: And throughout the meetings, the Community meetings you ultimately had some maps, based on the Community feedback, and so I guess one of my questions is is, will you be.

295

00:54:53.730 --> 00:55:09.330

Leisa Johnson: doing the same thing if, even if you start if you guys, I know, based on the demographics have your

own kind of maps that you've put together, will you be showing some of those to the Community during these Community meetings to give feedback on like happened last year.

296

00:55:12.360 --> 00:55:25.560

Shalice Tilton, NDC Sr. Consultant: We typically won't just naturally bring up the maps that were submitted last time, but what we will do we're hoping and and my hope is is that.

297

00:55:25.980 --> 00:55:38.160

Shalice Tilton, NDC Sr. Consultant: A couple of things can happen, especially with I mean you have some very constructive information, I would like to see if it would be helpful if you would submit these written comments.

298

00:55:39.390 --> 00:55:43.470

Shalice Tilton, NDC Sr. Consultant: and get them in the record and then send them out.

299

00:55:44.490 --> 00:55:47.550

Shalice Tilton, NDC Sr. Consultant: So submit maps that depict what you're speaking to.

300

00:55:49.590 --> 00:55:51.390

Leisa Johnson: submit those comments to.

301

00:55:53.880 --> 00:56:03.000

Shalice Tilton, NDC Sr. Consultant: Oh, you would submit them to the same that are, that is, on the mapping tools so and Ursula you may have it, I don't want to get it wrong.

302

00:56:04.260 --> 00:56:06.840

Leisa Johnson: So if I sent them to earth what could I also just do that.

303

00:56:07.380 --> 00:56:15.030

Shalice Tilton, NDC Sr. Consultant: it's actually this city clerk department Ursula Ursula i'm going to ask to have you come on and give that exact web address.

304

00:56:17.400 --> 00:56:19.710

Ursula De Loa: would be to the city cards department at.

305

00:56:20.730 --> 00:56:27.210

Ursula De Loa: city clerk dept@ci.richmond.ca.us.

306

00:56:27.570 --> 00:56:40.920

Leisa Johnson: Okay, so I can I can absolutely submit those kinds of comments on there and I actually reached out to the city attorney in advance of this meeting, to see if there was going to be a representative there.

307

00:56:42.480 --> 00:56:54.900

Leisa Johnson: And she said, if there was one of the assistant entity as attorneys responded and said, if there were questions that you could not address that you would then submit those questions to the city attorney's office.

308

00:56:57.210 --> 00:57:03.690

Shalice Tilton, NDC Sr. Consultant: Yes, so I I, and I want to go back and revisit the geographically contiguous.

309

00:57:05.100 --> 00:57:15.810

Shalice Tilton, NDC Sr. Consultant: It the mass do meet the definition the existing map does meet the definition to graphically contiguous so they need to be connected in some manner.

310

00:57:16.890 --> 00:57:24.810

Shalice Tilton, NDC Sr. Consultant: And each of the each of them are i'm not sure which area that you're looking at that doesn't seem like it's geographically contiguous.

311

00:57:24.900 --> 00:57:25.470

Leisa Johnson: I mean.

312

00:57:27.330 --> 00:57:43.200

Leisa Johnson: The little stretch that you guys are using to connect hilltop with the whole show rich the district to in most people's mind that is not geographically contiguous you guys are using a little part of the Richmond parkway which nobody lives on.

313

00:57:44.220 --> 00:57:45.390

Leisa Johnson: mm hmm it's.

314

00:57:46.860 --> 00:57:53.700

Leisa Johnson: it's just not a representation that anybody in the city believes represents the communities of interest.

315

00:57:54.870 --> 00:57:59.610

Shalice Tilton, NDC Sr. Consultant: yeah and, unfortunately, you have those areas that are just connected by a little.

316

00:58:00.840 --> 00:58:04.080

Shalice Tilton, NDC Sr. Consultant: Areas little strips of land, you know you're you're further.

317

00:58:04.140 --> 00:58:13.050

Shalice Tilton, NDC Sr. Consultant: further north area and you're for the seat Eastern or just connected by little strips But that does meet the legal definition of geographically contiguous.

318

00:58:14.220 --> 00:58:28.200

Leisa Johnson: yeah so many don't I I understand there's a technical thing there, but nobody in the city believes that hilltop and the point Richmond areas are anything at all connected to each other.

319

00:58:28.710 --> 00:58:37.290

Shalice Tilton, NDC Sr. Consultant: mm hmm so so hilltop by itself is too small to be in to to comprise the fulfilling a complete district.

320

00:58:38.460 --> 00:58:49.740

Leisa Johnson: Correct and so that's why maps one on one see and 114 be from last year were better because that actually expanded the hilltop area.

321

00:58:50.220 --> 00:59:02.670

Leisa Johnson: And it took that little skinny part that's in be that tiny little blue area and it kept that as part of the hilltop community, which makes more sense I mean it has absolutely nothing to do.

322

00:59:03.990 --> 00:59:06.480

Leisa Johnson: The bottom half of Richmond so.

323

00:59:06.840 --> 00:59:19.320

Shalice Tilton, NDC Sr. Consultant: It My suggestion would be if you believe that those two maps are good depictions and meet the new criteria which actually actually Richmond had to follow that criteria when drew these maps is to resubmit them.

324

00:59:20.370 --> 00:59:20.670

Leisa Johnson: yeah.

325

00:59:21.240 --> 00:59:31.680

Shalice Tilton, NDC Sr. Consultant: And that way they will be submitted a new, they will they will be called different numbers, but then resubmit them so they can get they will be in the mix and they will always be there for consideration.

326

00:59:32.730 --> 00:59:38.040

Leisa Johnson: Okay, and so, then and I don't know if you're allowed to answer these questions, but the attorney's Office told me to ask them.

327

00:59:38.580 --> 00:59:39.930

Shalice Tilton, NDC Sr. Consultant: Okay sure.

328

00:59:40.320 --> 00:59:49.920

Leisa Johnson: Then they said you wouldn't be submitting those questions to the attorney's office for them to be addressed at the next public hearing and I will also bring them up myself.

329

00:59:51.210 --> 00:59:53.010

Leisa Johnson: But we had.

330

00:59:54.600 --> 01:00:02.400

Leisa Johnson: And this was discussed in the public hearings, because I kept, bringing it up, which is the length of term of residency in our Charter.

331

01:00:04.140 --> 01:00:13.080

Leisa Johnson: And our Charter says one year and your legal staff was saying that many feel that that's not.

332

01:00:14.880 --> 01:00:28.320

Leisa Johnson: justifiable, it was still in the courts and some were saying it can be as low as 30 days and nobody in our community wants somebody that lives in their district, for only 30 days, so what is.

333

01:00:29.220 --> 01:00:44.640

Leisa Johnson: We need to get our Charter fixed in advance of November 2022 and that has to be by a vote of the people, and so I would like, for somebody to advise the city on what is the minimum amount of time.

334

01:00:45.060 --> 01:00:51.810

Leisa Johnson: that's legal for a person to reside in a district to be eligible to run, first of all.

335

01:00:52.410 --> 01:01:07.020

Leisa Johnson: that that is a major thing that was a problem last year and I don't know if you're aware of what happened last year, but in six three districts were up and in two of those districts three candidates were legally.

336

01:01:08.850 --> 01:01:14.010

Leisa Johnson: People were asking district attorney's office, if they were legal residents.

337

01:01:15.390 --> 01:01:28.560

Leisa Johnson: It was a mess and we don't have ranked choice voting and without rain choice voting if if a candidate drops out because they're deemed ineligible.

338

01:01:29.070 --> 01:01:41.340

Leisa Johnson: or they deemed out voluntarily or removed themselves weren't terribly but the ballot has already been printed and people are voting, there is no fair way to assess who wins that district.

339

01:01:42.450 --> 01:01:43.020

Shalice Tilton, NDC Sr. Consultant: And this is.

340

01:01:43.230 --> 01:01:54.000

Shalice Tilton, NDC Sr. Consultant: This would be a question for the legal counsel Ursula insurance also taking notes, but I can tell you, for those who are silent in their Charter and general law cities, there is no.

341

01:01:54.780 --> 01:02:01.200

Shalice Tilton, NDC Sr. Consultant: fixed time that a candidate has to be they just have to be a registered voter at the time they pull papers so.

342
01:02:02.130 --> 01:02:04.350
Leisa Johnson: When they pull nomination papers and that's what our.

343
01:02:04.410 --> 01:02:07.710
Leisa Johnson: The way our ordinances written which conflicts with our Charter.

344
01:02:08.850 --> 01:02:10.110
Leisa Johnson: specifically says one year.

345
01:02:10.650 --> 01:02:14.520
Shalice Tilton, NDC Sr. Consultant: yeah so that's something that are solo make sure it gets too.

346
01:02:15.870 --> 01:02:17.190
Shalice Tilton, NDC Sr. Consultant: So, then the other Council.

347
01:02:17.430 --> 01:02:33.360
Leisa Johnson: And maybe you Maybe you can answer this question, but it gets down to there's no, you said at the very beginning on your first slide on number one there's no racial gerrymandering allowed Okay, so there is gerrymandering allowed.

348
01:02:34.470 --> 01:02:42.690
Leisa Johnson: I think, by the way our Council is going to vote on this map and I don't know how we, as citizens are protected from that and i'm gonna bring this up, because this is the issue.

349
01:02:43.770 --> 01:02:48.270
Leisa Johnson: You legally cannot run if the districts are redrawn.

350
01:02:49.860 --> 01:02:58.830
Leisa Johnson: Okay, in this new process with districts are redrawn and somebody comes up on current Council in district one, five and six okay.

351
01:02:59.700 --> 01:03:13.320
Leisa Johnson: They were elected in 2020 they want to rerun in 2024 if their district line has been been redrawn such that they are no longer in the same district.

352
01:03:14.130 --> 01:03:31.770
Leisa Johnson: They can't legally run in 2024 because you have to have lived in your district your new district, by the time you draw nominations papers and you can't do that because you have to serve out your entire four year term in your existing district.

353
01:03:33.900 --> 01:03:39.030
Leisa Johnson: Do you see it, so if I live in district one and now my district line gets redrawn.

354

01:03:40.140 --> 01:03:54.000

Leisa Johnson: i'm saying i'm a city council Member in district one I got elected I started serving in January 2021 I have to technically live in that district for the entire length of my term which doesn't end until January 2025.

355

01:03:55.140 --> 01:04:00.150

Leisa Johnson: If you redraw their district boundary and now they're saying district to.

356

01:04:01.380 --> 01:04:07.230

Leisa Johnson: They can't and they want to move they can't because they have to serve out their term.

357

01:04:08.880 --> 01:04:18.360

Shalice Tilton, NDC Sr. Consultant: Actually, they they aren't mandated to serve out there term but they if they if I think, as I understand your scenario.

358

01:04:19.230 --> 01:04:35.610

Shalice Tilton, NDC Sr. Consultant: Council member for as your example said there in district one and the lines were drawn so now they're in district two they continue to serve out their term as district one now if the district two seat came up in 2022.

359

01:04:37.500 --> 01:04:42.000

Shalice Tilton, NDC Sr. Consultant: That Council member would have the opportunity to run for that 2020 to see.

360

01:04:43.350 --> 01:04:46.890

Shalice Tilton, NDC Sr. Consultant: If they lose, they would retain their still district one see.

361

01:04:47.430 --> 01:05:00.930

Leisa Johnson: Until the end of 2024 but then they're out of a Council seat, and I want to ensure that they don't gerrymander the maps to ensure that they get to.

362

01:05:01.320 --> 01:05:08.760

Leisa Johnson: stay in their district for four years and still run again that is gerrymandering and that's if they're going to come if they're going to vote on a map.

363

01:05:09.000 --> 01:05:19.500

Leisa Johnson: That allows them to continue to stay where they are and run and they're going to put their self interest and their seat ahead of the entire what's best for the Richmond Community that's not fair.

364

01:05:21.330 --> 01:05:30.030

Shalice Tilton, NDC Sr. Consultant: And those are the comments that you'd want to bring up when they're discussing the maps, if you if you think that that was the intent if it's a particular map.

365

01:05:31.650 --> 01:05:32.940

Shalice Tilton, NDC Sr. Consultant: And we, and we do have.

366

01:05:35.250 --> 01:05:38.010

Shalice Tilton, NDC Sr. Consultant: Another attendee that is wanting to speak.

367

01:05:38.190 --> 01:05:39.480

Leisa Johnson: That and that was my last question.

368

01:05:39.660 --> 01:05:48.030

Shalice Tilton, NDC Sr. Consultant: Okay okay so yeah those are those are comments that you definitely want to bring up before the Council is they're analyzing the maps.

369

01:05:48.510 --> 01:05:49.710

Leisa Johnson: Okay, great Thank you.

370

01:05:52.080 --> 01:05:57.210

Shalice Tilton, NDC Sr. Consultant: The next speaker that I see a hand raised for is Suzuki ready Rodriguez ventura.

371

01:06:00.000 --> 01:06:07.440

Suzuki Rodriguez Ventura: Thanks so much, I was just wondering if there's a legal definition or communities of interest or shared interest.

372

01:06:08.460 --> 01:06:21.540

Suzuki Rodriguez Ventura: Because yeah just thinking about you know I may not live in the shoreline or Marina area but I use that space a lot, so it is an interest of mine but I don't know you know what the legal definition is there when we're thinking about redistricting.

373

01:06:22.890 --> 01:06:30.690

Shalice Tilton, NDC Sr. Consultant: yeah and there is a legal definition and but it's not going to be, I think, very helpful to you, but i'll read it for you.

374

01:06:31.170 --> 01:06:43.560

Shalice Tilton, NDC Sr. Consultant: it's a community of interest is a population that shares common social or economic interests that should be included with within a single district for purposes of its effective and fair representation.

375

01:06:45.450 --> 01:07:07.050

Shalice Tilton, NDC Sr. Consultant: Now, I can tell you that when you look at the websites of organizations that sponsored this legislation such as common cause, there are there are significant detail on what they would describe as communities of interest, and those are things such as you mentioned.

376

01:07:09.000 --> 01:07:09.570

Shalice Tilton, NDC Sr. Consultant: Some.

377

01:07:10.680 --> 01:07:18.480

Shalice Tilton, NDC Sr. Consultant: It could be anything from work habits, it could be shared concerns about the environment, shared concerns about.

378

01:07:19.740 --> 01:07:25.140

Shalice Tilton, NDC Sr. Consultant: The economy in a particular area shared concerns about public safety.

379

01:07:27.270 --> 01:07:35.160

Shalice Tilton, NDC Sr. Consultant: different things it's really it's up to you to define what that community is so anything that unites a.

380

01:07:36.060 --> 01:07:52.470

Shalice Tilton, NDC Sr. Consultant: Community together but keep in mind for purposes of redistricting it would need to make sure that there is a geographically concentrated in an area, so that when you're considering drawing the boundaries, we could respect those boundaries.

381

01:07:54.660 --> 01:07:55.290

Suzuki Rodriguez Ventura: Thanks so much.

382

01:07:59.550 --> 01:08:00.330

Shalice Tilton, NDC Sr. Consultant: Any other.

383

01:08:01.650 --> 01:08:04.740

Shalice Tilton, NDC Sr. Consultant: Participants wanting to comment or ask a question.

384

01:08:09.510 --> 01:08:16.890

Shalice Tilton, NDC Sr. Consultant: And I don't see any additional hands raised, I do want to Oh, we do have miss Johnson.

385

01:08:19.890 --> 01:08:21.180

Shalice Tilton, NDC Sr. Consultant: We could promote go back.

386

01:08:21.750 --> 01:08:24.840

Leisa Johnson: Real quick is the next Community meeting.

387

01:08:26.970 --> 01:08:32.010

Shalice Tilton, NDC Sr. Consultant: The next meeting is going to be actually a city council meeting on September 14.

388

01:08:32.310 --> 01:08:34.620

Leisa Johnson: yeah that's the pub the next that's the second.

389

01:08:36.210 --> 01:08:38.670

Shalice Tilton, NDC Sr. Consultant: And right now there are no other workshops scheduled.

390

01:08:43.200 --> 01:08:45.630

Leisa Johnson: Is there plans to do another workshop or not.

391

01:08:47.490 --> 01:08:55.860

Shalice Tilton, NDC Sr. Consultant: I am not i'm not aware of any direction to have additional workshops at this point because i'm not that's, not to say there won't be but.

392

01:08:57.330 --> 01:08:58.740

Leisa Johnson: Okay, thank you all right.

393

01:08:59.850 --> 01:09:09.420

Shalice Tilton, NDC Sr. Consultant: Thank you and thank you for your comments, so those are, I think are very helpful and, again, the best way, if you want those maps reconsidered seventh those maps.

394

01:09:11.670 --> 01:09:28.830

Shalice Tilton, NDC Sr. Consultant: And then, and also to if you could you know write down any comments I miss Johnson had some excellent ones, we want to hear more of those from the rest of the Community as well, and please do submit your map so when it just double check to make sure.

395

01:09:31.920 --> 01:09:36.420

Sabrina Lundy: So Lisa you able to address the questions in the Q amp a in the chat.

396

01:09:37.440 --> 01:09:55.680

Shalice Tilton, NDC Sr. Consultant: Okay, so I am just looking at the Q amp a I see there's one question saying i'm curious about district two, I was told by some that the reason that is a salamander was an oil boat unavoidable for sorry little tongue tied today, why is it drawn that way.

397

01:10:00.720 --> 01:10:01.710

Shalice Tilton, NDC Sr. Consultant: district two.

398

01:10:03.840 --> 01:10:13.500

Shalice Tilton, NDC Sr. Consultant: i'm not sure if it's necessarily unavoidable to be drawn that way, but you do have to keep in mind that we do have to population balance.

399

01:10:14.010 --> 01:10:21.060

Shalice Tilton, NDC Sr. Consultant: So I mean you could draw districts, a number of ways, for example, the district's physio horizontal if that made sense.

400

01:10:21.450 --> 01:10:35.070

Shalice Tilton, NDC Sr. Consultant: So it doesn't necessarily need to be drawn the way it is, but we you we will have some odd lucky maps when, particularly when you're talking about the north end of districts, too, because it doesn't have enough population to be by itself.

401

01:10:36.240 --> 01:10:43.020

Shalice Tilton, NDC Sr. Consultant: So it will spill over into some of those areas and be connected by those very narrow strip.

402

01:10:45.270 --> 01:10:45.960

Shalice Tilton, NDC Sr. Consultant: And then.

403

01:10:47.130 --> 01:10:50.610

Shalice Tilton, NDC Sr. Consultant: Let me look in the chat I have not been following the chat.

404

01:10:55.230 --> 01:10:59.970

Shalice Tilton, NDC Sr. Consultant: there's always that question about and then reading the question in the chat about.

405

01:11:00.930 --> 01:11:17.880

Shalice Tilton, NDC Sr. Consultant: A goal is to have a legacy next majority and then, when we're talking citizen voting age population majority, how is that not racial gerrymandering and that's always a question that is asked race definitely is a consideration, but.

406

01:11:19.140 --> 01:11:27.270

Shalice Tilton, NDC Sr. Consultant: Rather than just solely looking at race and I can tell you i've seen map submitted where folks are just looking to increase that percentage of.

407

01:11:27.660 --> 01:11:44.400

Shalice Tilton, NDC Sr. Consultant: proportion of your lead phoenix Community so they will literally just make a very narrow strip pick pick up a bubble of the Latino Community go another narrow strip pick up the bubble of the Latino community and go another narrow strip as opposed to.

408

01:11:45.690 --> 01:11:54.690

Shalice Tilton, NDC Sr. Consultant: Really, looking at the Community as a whole and so that's why I mentioned, in addition to race, you also need to take in consideration that entire Community.

409

01:11:55.140 --> 01:12:04.290

Shalice Tilton, NDC Sr. Consultant: So likely, it has same type shares type of housing, the shape the same shared culture same history.

410

01:12:04.740 --> 01:12:13.620

Shalice Tilton, NDC Sr. Consultant: And so that's what we want to also keep that in mind when you're trying to districts in those cases where i've seen those odd shape maps that we've simply asked listed knitter.

411

01:12:14.400 --> 01:12:26.010

Shalice Tilton, NDC Sr. Consultant: But what can you explain why your map was drawn that way and in all cases, it would be, because I wanted to increase the percentage of our lives of the.

412

01:12:27.510 --> 01:12:32.190

Shalice Tilton, NDC Sr. Consultant: Of the Latino community and so that's a violation of the law.

413

01:12:34.500 --> 01:12:36.000

Shalice Tilton, NDC Sr. Consultant: let's see another question.

414

01:12:37.770 --> 01:12:41.550

Shalice Tilton, NDC Sr. Consultant: Okay, I think that was that was asked verbally and we saw.

415

01:12:43.020 --> 01:12:43.980

Shalice Tilton, NDC Sr. Consultant: and

416

01:12:47.340 --> 01:13:06.180

Shalice Tilton, NDC Sr. Consultant: Geographically contiguous even when there is zero population that connects an area, it is still geographically continuous so it's all of the city own property that will continue with that we're discussing So yes, zero population areas can connect populated areas.

417

01:13:07.260 --> 01:13:16.650

Shalice Tilton, NDC Sr. Consultant: The one thing you can't do is cross waterways if there's no way to get across the water, so there has to be a bridge or tunnel or or something else but that's not the.

418

01:13:21.390 --> 01:13:22.080

Shalice Tilton, NDC Sr. Consultant: Sea.

419

01:13:23.280 --> 01:13:29.190

Shalice Tilton, NDC Sr. Consultant: And also there's much discussion about district to feeling that it's gerrymandered.

420

01:13:30.630 --> 01:13:33.780

Shalice Tilton, NDC Sr. Consultant: It would be good to to verbalize how you with.

421

01:13:35.730 --> 01:13:47.190

Shalice Tilton, NDC Sr. Consultant: or article on district are and just drive a district to i'm assuming when you're talking about district, to perhaps you're talking about two different sections of it, the northern section and the Western section so.

422

01:13:48.600 --> 01:13:59.880

Shalice Tilton, NDC Sr. Consultant: What if you're just satisfied with existing map draw those two districts you don't need to draw the rest of the map, but tell us what how those districts with better be aligned and reach population.

423

01:14:07.110 --> 01:14:26.280

Shalice Tilton, NDC Sr. Consultant: There was a point made that that yes, information and emails that are sent our our public records with the maps, we do not publish we do not publish the names on the map so who submitted them, but if some more do a public records request that would be no.

424

01:14:28.740 --> 01:14:29.220

Shalice Tilton, NDC Sr. Consultant: And I.

425

01:14:31.680 --> 01:14:33.540

Shalice Tilton, NDC Sr. Consultant: think that let's see.

426

01:14:37.830 --> 01:14:55.530

Shalice Tilton, NDC Sr. Consultant: Okay, and there's another comment about about and you'll hear me use the word gerrymandering as opposed to gerrymandering is that was it was actually named after a man whose last name is Gary and so as demographers we actually use Boston Massachusetts Davis, one of the.

427

01:14:57.210 --> 01:15:00.540

Shalice Tilton, NDC Sr. Consultant: signers of our constitution and Vice President and.

428

01:15:01.770 --> 01:15:10.200

Shalice Tilton, NDC Sr. Consultant: It is anyway, so we ended up like gerrymandering just doesn't respect of that history and the people of Massachusetts he requested that.

429

01:15:11.970 --> 01:15:18.300

Shalice Tilton, NDC Sr. Consultant: But there was a question about about during boundary and just the history that that.

430

01:15:20.790 --> 01:15:31.620

Shalice Tilton, NDC Sr. Consultant: Sharing the the thought that Joe many was used benefit white people so as well it's been discussing the importance of making sure that every districts don't reflect.

431

01:15:33.030 --> 01:15:40.290

Shalice Tilton, NDC Sr. Consultant: Do not group folks based on recent long again, yes, we do want to want to consider the communities of.

432

01:15:41.760 --> 01:15:49.110

Shalice Tilton, NDC Sr. Consultant: And one last week, have you have parkchester village North Richmond Richmond and hilltop your district to.

433

01:15:50.220 --> 01:15:58.110

Shalice Tilton, NDC Sr. Consultant: How can the poor North Richmond and purchase or compete with hilltop four point Richmond for representation.

434

01:15:59.280 --> 01:16:05.490

Shalice Tilton, NDC Sr. Consultant: So those are those are very good comments that we will capture these comments and.

435

01:16:07.140 --> 01:16:12.630

Shalice Tilton, NDC Sr. Consultant: Then, if if it would be very helpful to say okay how where.

436

01:16:13.980 --> 01:16:14.460

Shalice Tilton, NDC Sr. Consultant: Were.

437

01:16:15.630 --> 01:16:17.820

Shalice Tilton, NDC Sr. Consultant: Better aligns with North Richmond and porchester.

438

01:16:19.200 --> 01:16:21.840

Shalice Tilton, NDC Sr. Consultant: Those are those are good things for us to awesome.

439

01:16:24.000 --> 01:16:34.560

Shalice Tilton, NDC Sr. Consultant: Okay, I think I covered everything in the chat and I don't see any further hands raise so I want to thank you for participating participation is the key.

440

01:16:34.860 --> 01:16:49.890

Shalice Tilton, NDC Sr. Consultant: I can tell you from my own experience, the most powerful thing to do is submitted map because we don't weed out maps we don't eliminate maps all maps are on the table that are submitted so as I mentioned, if you like, a previous map that was wrong Please submit that map.

441

01:16:51.810 --> 01:16:54.480

Shalice Tilton, NDC Sr. Consultant: And we will put it on the table so.

442

01:16:55.950 --> 01:17:00.300

Shalice Tilton, NDC Sr. Consultant: I want to turn it back over to Ursula That concludes my presentation.

443

01:17:05.010 --> 01:17:13.350

Ursula De Loa: Okay, thank you very much ELISE and to all those who participated, and also to miss a mouthpiece for translation services tonight.

444

01:17:13.890 --> 01:17:30.750

Ursula De Loa: And just as a reminder for more information about the redistricting process, please visit the city's redistricting web page@www.ca.taught.richmond.ca.us forward slash redistricting and have a good evening.

01:08:03 Leisa Johnson: If the goal is to still have a Latino majority district, how is that not racial gerrymandering?

01:09:51 Leisa Johnson: Several of our current districts don't meet #2 as they are not 1) geographically contiguous, 2) neighborhoods with common interest are broken up and 3) they are not compact.

01:49:38 Edie Alderette-Sellers: CityClerkDept@ci.richmond.ca.us.

01:51:46 Edie Alderette-Sellers: What defines "geographically contiguous"? There's zero population along what is connecting these two areas.

01:58:32 Edie Alderette-Sellers: Thank you for using the G-word, Liesa.

01:58:51 Edie Alderette-Sellers: Because everybody in District 2 is thinking that word.

02:00:04 Leisa Johnson: Ursula - Are you printing out this chat for Public Record?

02:02:09 Edie Alderette-Sellers: I'd like her to address how District 2 is "geographically related" to each other, using Shalice's explanation of Community of Interest.

02:04:13 Suzuki Rodriguez Ventura: thanks so much for the presentation. it's helpful to understand how we can submit feedback.

02:07:34 Suzuki Rodriguez Ventura: I think for a long time gerrymandering was used to benefit white people so I'm glad that we are talking about the importance of making sure that our redistricting lines do not group folks based on race alone.
